| Version: | 1.0.12 |
| Status: | DRAFT |
| Effective Date: | 17 April 2026 |

# TABLE OF CONTENTS

# DP-00003 (MEM): The Gigabus Proposal - Summary

**Status:** Draft (proposal memorandum; to be voted)

**Version:** 1.0.12

**NON-BINDING SUMMARY.** This memorandum is informational only and is subordinate to the governing instruments and any adopted resolutions. In the event of conflict, the normative resolution text controls.

## TLDR

This proposal packages a tightly related post-formation set of actions into one vote while keeping each lane separate. DP-00003 now does six things: it records a clean governance-side acknowledgment that SOLOMON DAO LLC has been formed in the Marshall Islands; it adopts a full proposal memorandum that tables four attached full memoranda and one attached Operational Pack as part of the same package; it establishes the Licensing Subcommittee as the DAO-side body for Protocol IP licensing matters only and not as a downstream operating or registration body; it ratifies and activates the Treasury Subcommittee, styled **"The Illuminated,"** following the pre-formation path already adopted in DP-00001, for designated Company Treasury Account(s) only, designates the Squads v4 multisig account `8GVq1srBAZBsCeYpwdKUwEXzDffwAE5xSLWB1ec2gerr` titled `SOLOMON TREASURY SUBCOMMITTEE` as the Company Treasury Vault, confirms a **3 of 5** control structure with four Treasury Subcommittee-member signers and one backup-only continuity signer subject to a **2 day** timelock, authorizes an initial transfer of **4,500,000 USDC** from the main DAO treasury into that vault, applies the same applicable per-period treasury spend limit across that treasury lane on a shared no-duplication basis, requires a corresponding Smart Contract Registry update through the **SOP Registry**, and preserves a confidentiality-first operating posture for security-sensitive treasury details; it also now makes explicit that drafts, summaries, chats, registry notes, and other facilitative or partial materials do not amend or override the governing instruments, that authority remains collective, written, and lane-specific, and that no treasury-side approval, allowlist, reporting step, or payment flow by itself creates broader duty, apparent authority, pass-through rights, or downstream operating attribution; it adds a bounded legal-budget clarification memorandum so the previously released DP-00001 Legal Budget may also cover audits, documented payment, settlement, or reimbursement of accrued and unpaid legal and related professional expenses, and other similar DAO-related professional or administrative expenses without becoming an unrestricted general discretionary fund; and it bundles an Operational Pack that ratifies **SOP-00001** and **SOP-00002** as adopted Tertiary Instruments and anchors them into the SOP Registry architecture.

What this unlocks is a cleaner post-formation governance record without having to run a fragmented sequence of closely related proposals. The Marshall Islands formation acknowledgment, licensing lane, treasury lane, and initial tertiary-instrument ratification can each be tabled in one package while still being read separately, narrowly, and within the existing firewall logic.

## Simple overview (who / what / where / why)

**Who**

- DAO members voting through the Governance System.
- The Head Steward, acting only within narrow ministerial, documentary, and notice limits stated in the full texts.
- The Licensing Subcommittee, once appointed, for Protocol IP licensing matters only.
- The Treasury Subcommittee, styled **"The Illuminated,"** for designated Company Treasury Account(s) only, with the members confirmed here from DP-00001: Drew, Usman, Kru, and Kollan.

**What**

This proposal does **six** main things:

1. **Records the Company's formation footing.** It puts a clean on-chain governance acknowledgment on record that SOLOMON DAO LLC exists as a Marshall Islands DAO LLC and that post-formation governance proceeds on that footing.
2. **Adopts a full omnibus proposal package.** The proposal uses one full memorandum together with four attached full memoranda and one attached Operational Pack, each covering one proposal lane being tabled in the package.
3. **Establishes the Licensing Subcommittee.** This creates the DAO-side body for Protocol IP licensing matters only, with bounded delegated authority, record discipline, optional Professional Determinations, and express limits clarifying that Company-side IP licensing is not, by itself, downstream direction, agency, registration control, or operational supervision.
4. **Activates the treasury-side Company account pathway.** This ratifies and activates the Treasury Subcommittee, styled **"The Illuminated,"** for designated Company Treasury Account(s), designates the Squads v4 multisig account `8GVq1srBAZBsCeYpwdKUwEXzDffwAE5xSLWB1ec2gerr` titled `SOLOMON TREASURY SUBCOMMITTEE` as a Company Treasury Account and the Company Treasury Vault, authorizes an initial transfer of **4,500,000 USDC** from the main DAO treasury into that vault, applies the same applicable per-period treasury spend limit across that same treasury lane on a shared no-duplication basis, and preserves a confidentiality-first operating posture for security-sensitive treasury details, subject to the Formation Condition and the attached treasury memorandum.
5. **Clarifies and widens the DP-00001 Legal Budget on a bounded basis.** This tables a dedicated memorandum clarifying that the capped DP-00001 Legal Budget may also be used for audits, documented payment, settlement, or reimbursement of accrued and unpaid legal and related professional expenses, and other directly attributable DAO-related professional or administrative expenses of the same character, while expressly prohibiting treatment of that budget as an unrestricted general discretionary fund.
6. **Bundles an Operational Pack for initial SOP ratification.** This tables a dedicated Operational Pack

that ratifies **SOP-00001** and **SOP-00002** by identifier, version, registry path, and content identifier so those two instruments become adopted Tertiary Instruments and can be recorded in the SOP Registry as the current ratified copies.

**Where**

- The vote happens in the DAO's on-chain Governance System.
- The full normative text is split across the omnibus memorandum and the attached package texts listed in the index and metadata.
- The public formation-evidence trail is expected to point to the `compiled-documents/company-agreement` record set, including `Company_Agreement_SOLOMON_DAO_LLC_IND-index.md`, which indexes the clean compiled reading copy together with the filed, stamped, certified, and related Marshall Islands return documents.
- Formation evidence, controlled-record references beyond the public vault address and stated control structure, SOP content identifiers, and other execution items are intended to be completed at posting time or linked by recorded authority evidence where stated, while security-sensitive treasury operating details may remain confidential.

**Why**

- To keep the post-formation record clean and harder to attack later with bad arguments about silence, footing, or supposed absence of member acknowledgment.
- To establish the licensing lane now, rather than requiring a separate proposal immediately after formation.
- To activate the treasury-side Company account pathway under explicit limits rather than informal drift.
- To ratify **SOP-00001** and **SOP-00002** through the charter-described Operational Pack pathway, rather than leaving them as interim-only tertiary texts.
- To preserve a clear, recorded movement path from the main DAO treasury into a second multisig or vault without drifting into unstated treasury powers.
- To widen the already released DP-00001 Legal Budget in a bounded way for audits, payment, settlement, or reimbursement of accrued and unpaid legal expenses, and similar DAO-side professional expenses without turning it into an unrestricted general discretionary fund.

## 1. Incorporation recognition and governance acknowledgment

One attached full memorandum records the DAO's on-chain acknowledgment that SOLOMON DAO LLC has been validly formed in the Republic of the Marshall Islands and exists as a legal person under the applicable Marshall Islands framework.

That attached text also records that the Company Agreement takes effect according to its own terms and that later governance actions are being taken on that post-formation footing. It is evidentiary and governance housekeeping in character. It does not purport to re-form the Company or create the fiction that a later vote was needed for the Company to exist.

The intended public anchor for that evidence trail is the `compiled-documents/company-agreement` record set, especially `Company_Agreement_SOLOMON_DAO_LLC_IND-index.md`, which indexes the clean compiled reading copy together with the filed, stamped, certified, and related Marshall Islands return documents. The current public commit anchor for that record set is `d3e6999a5edd2413857516f450c90faab60fa5b9`.

This matters because it gives the governance record a clear post-formation anchor while avoiding nonsense arguments from silence later.

## 2. Licensing Subcommittee

Another attached full memorandum establishes the Licensing Subcommittee as the DAO-side body for Protocol IP licensing matters only.

It keeps the licensing lane separate. The Licensing Subcommittee exists to review and administer Protocol IP licensing matters within the existing IP framework, maintain licensing-side records, and use bounded delegated authority where permitted. It is not an operational body, and it does not collapse licensing into any other lane. It approves Company-side IP licenses only; it does not and shall not direct downstream opcos, licensees, or implementers on registration, licensing strategy, treasury, or day-to-day operations.

That attached text also retains optional Professional Determinations, the no-single-person rule, register discipline, and the rule that the Company is not made into the operator of any licensee business merely because licensing-side diligence, contractual protections, or package conditions exist. It also adds stronger capacity, agency, and cross-lane-effect limits to keep the licensing lane firewalled from treasury and downstream operating lanes.

## 3. Treasury Subcommittee ratification and initial transfer

Another attached full memorandum is the post-formation treasury activation step and successor to the pre-formation readiness path already approved in DP-00001.

It designates the Squads v4 multisig account `8GVq1srBAZBsCeYpwdKUwEXzDffwAE5xSLWB1ec2gerr` titled `SOLOMON TREASURY SUBCOMMITTEE` as an official Company Treasury Account and the Company Treasury Vault, ratifies and activates the Treasury Subcommittee, styled **"The Illuminated,"** for designated Company Treasury Account(s) only, confirms the DP-00001 Designates (Drew, Usman, Kru, and Kollan) as the Treasury Subcommittee members under this post-formation memorandum, confirms a **3 of 5** control structure with one backup-only continuity signer subject to a **2 day** timelock, authorizes a transfer of **4,500,000 USDC** from the main DAO treasury into the Company Treasury Vault, clarifies that use of the main DAO treasury and the Company Treasury Vault within the same approved treasury lane counts toward one shared per-period treasury spend limit without duplication, requires a corresponding Smart Contract Registry update to be recorded through the **SOP Registry**, and keeps the detailed operating posture confidential where disclosure would prejudice security.

This part is intentionally hard-gated. Formation evidence must exist. The public memorandum now states the vault address and the core **3 of 5** / **2 day** backup continuity structure, while controlled-record details beyond that may still need to be linked by authority evidence. Not every treasury operating detail is intended for unrestricted public posting. The updated text now also makes clear that informal materials, partial extracts, and historical practice do not override the adopted treasury lane, that no one acquires treasury authority merely by role, access, or association, that no pass-through or holder-style rights arise merely from interacting with the vault or receiving a transfer, and that treasury-side constraints do not by themselves make the DAO or Treasury Subcommittee the operator of a third-party service stack. Nothing in this part authorizes buybacks, governance threshold changes, or other extra treasury steps not expressly stated there.

## 4. Legal Budget clarification and bounded expanded use

Another attached full memorandum supplements DP-00001 by clarifying that the already released and still-capped Legal Budget may be used for more than narrow forward-looking legal and compliance work. It expressly permits bounded use for program, smart contract, protocol, treasury- control, legal, regulatory, and compliance audits; for documented payment, settlement, or reimbursement of accrued and unpaid legal and related professional expenses; and for other similar DAO-related professional or administrative expenses of the same character.

It does **not** increase the cap, does **not** change the Legal Budget Wallet, does **not** create new signers or spending authority, and does **not** turn the Legal Budget into an unrestricted general discretionary fund or open-ended operating pool.

## 5. Operational Pack and tertiary-instrument adoption

Another attached full memorandum is the bundled **Operational Pack** for initial tertiary-instrument ratification under Founding Charter Article VIII and **SOP-00000**.

That attached text states the scope statement, change log, registry-reference fields, content-identifier fields, and effective-date mechanics for the pack. It ratifies **SOP-00001** and **SOP-00002** by identifier, version, registry path, and content identifier, and it provides the anchor path by which those adopted instruments can be recorded in the **SOP Registry** as the current ratified copies without discretionary rewriting.

## 6. How this package fits together

DP-00003 is structured as:

1. **one summary memorandum;**
2. **one full omnibus proposal memorandum;**
3. **separate full memorandum texts for each proposal being tabled in the omnibus package;** and
4. **a registry-linked Operational Pack adopting two identified SOPs without bundling their full text in the proposal packet.**

One of those attached full memoranda is now the bounded legal-budget clarification memorandum tied back to DP-00001.

That preserves the existing proposal pattern while still letting the DAO vote the package as a single coherent record.

## 7. What DP-00003 does not do

For clarity, this proposal does not:

- collapse the licensing lane and treasury lane into a single power center;
- create any unstated permanent office, override right, or by-conduct expansion of authority;
- use a tertiary instrument or Operational Pack to amend a Primary or Secondary Instrument or to expand authority beyond the existing hierarchy;
- create any individual Subcommittee authority, implied bloc voting, or deemed acting in concert among Members by reason only of common Membership or Subcommittee service;
- authorize the Company, the Head Steward, or any Subcommittee to direct, supervise, or control the operations of any Licensee, counterparty, service provider, or downstream entity, including on licensing, treasury, registration, or operating posture;
- waive existing limits in the Company Agreement;
- convert the DP-00001 Legal Budget into an unrestricted general discretionary fund, general operating pool, or open-ended discretionary spend bucket;
- create any broader fiduciary, trust, agency, partnership, custody, or advisory duty by reason only of Subcommittee service, signer status, backup continuity status, draft circulation, or facilitation;
- permit any draft, summary, chat, registry note, control record, or other partial or facilitative material to amend, reinterpret, or override the adopted text or the higher-precedence Company Agreement instruments;
- allow any course of dealing, silence, facilitation pattern, or status-based assumption to create waiver, modification, apparent authority, or cross-lane authority creep;
- create any pass-through, holder-style, third-party, or transitive right under the treasury lane merely by reason of receipt, payment flow, appearance in a control record, or reliance on a public summary or posting; or
- fill the posting-time execution fields that still need to be completed before submission and execution.

Those execution details, appointments, and implementation steps must stay within the Company Agreement and applicable law.

**Disclaimer (Governance Proposal; No Professional Advice).**

This document is a governance proposal and governance communication. If adopted by the DAO through its governance mechanisms, it may become binding on the DAO and persons exercising authority under the Company Agreement to the extent provided in the Company Agreement and applicable law. This document does not constitute legal, tax, financial, or other professional advice. The author(s) are not acting as legal counsel to the DAO or any member or user. No attorney-client relationship is created.

You must obtain your own independent advice for your circumstances.

# DP-00003 (MEM): The Gigabus Proposal

**Status:** Draft (intended for ratification via Governance System)

**Version:** 1.0.12

**Owner:** SOLOMON DAO LLC (via Governance System)

**Applies to:** DAO governance participants; the Head Steward acting only within the limited scope stated in the attached texts; any later appointed Licensing Subcommittee members; Treasury Subcommittee members; signers or operators of any designated Company Treasury Account; and any counsel, service provider, or counterparty receiving authority confirmations or ministerial execution documents under this package.

**Effective date:** As stated in the attached texts. This memorandum itself is effective as part of the omnibus package upon ratification by Governance System.

**Authority note:** This proposal is a single omnibus proposal package. It is intended to replace separate near-term post-formation proposals for incorporation recognition, Licensing Subcommittee formation, Treasury Subcommittee post-formation activation, legal-budget clarification, and initial Operational Pack ratification of designated Tertiary Instruments. The attached texts remain lane-separated, must be read narrowly according to their own terms, and do not authorize cross-lane control, operational control, cross-lane attribution, decontextualized or standalone authority, or by-conduct expansion of authority.

**Confidentiality classification:** Public (operational or security-sensitive details may be handled under appropriate confidentiality controls)

**Supersedes:** None

**Related:** the Operating Agreement of SOLOMON DAO LLC; the Founding Charter of SOLOMON DAO LLC;

SOP-00000; SOP-00001; SOP-00002; the SOP Registry; the draft Licensing Subcommittee proposal text;

the draft post-formation Treasury Subcommittee proposal text; the draft legal-budget clarification memorandum; and any later appointment records, undertakings, execution bundles, Operational Pack records, or register entries adopted consistently with this package.

---

## Intellectual Property Firewall

**"Protocol"** in this Resolution has the same meaning as **"Protocol IP"** as defined in the Company Agreement of SOLOMON DAO LLC (Operating Agreement §2.1(17)) — design, documentation, code, repositories, and other intellectual property. It does not mean an operating business, service, issuer, custodian, counterparty, or other person or entity.

Nothing in this Resolution authorizes the Company, the Head Steward, or any Subcommittee to direct, supervise, or control the operations of any Licensee, counterparty, service provider, or other person. Any external obligations arise only under the applicable License or other written agreement, and only to the extent expressly stated there.

## 1. Purpose

This Resolution does six things:

1. records a clean on-chain acknowledgment that **SOLOMON DAO LLC** has come into existence as a Marshall Islands DAO LLC and that post-formation governance will proceed on that footing;
2. adopts one omnibus proposal text together with four attached full memoranda and one attached Operational Pack forming part of the same package;
3. establishes the **Licensing Subcommittee** as the Company's internal body for Protocol IP licensing matters only, with bounded delegated authority, record discipline, optional external Professional Determinations, and express limits clarifying that approval of Protocol IP licenses does not, by itself, become direction of any downstream operator, registration path, or operating stack;
4. ratifies and activates the **Treasury Subcommittee**, styled **"The Illuminated,"** for designated **Company Treasury Account(s)** only, designates the Squads v4 multisig account `8GVq1srBAZBsCeYpwdKUwEXzDffwAE5xSLWB1ec2gerr` titled `SOLOMON TREASURY SUBCOMMITTEE` as the Company Treasury Vault and a Company Treasury Account, confirms a **3 of 5** signer structure in which four signers are Treasury Subcommittee Members and the fifth may be a backup-only continuity signer subject to a **2 day** timelock, authorizes an initial transfer of **4,500,000 USDC** from the main DAO treasury into that vault, clarifies that the applicable per-period treasury spend limit applies on a shared aggregate basis across that treasury lane without duplication, requires a corresponding Smart Contract Registry update to be recorded through the **SOP Registry**, and preserves a confidentiality-first operating posture for security-sensitive treasury details, subject to the Formation Condition and the attached treasury memorandum;
5. includes a memorandum that clarifies and widens, on a bounded basis, the permitted uses of the capped Legal Budget previously released in DP-00001 so that it may also be used for audits, payment, settlement, or reimbursement of accrued and unpaid legal and related professional expenses, and other directly attributable DAO-related professional or administrative expenses of the same character, without becoming an unrestricted general discretionary fund; and
6. includes an **Operational Pack** that ratifies **SOP-00001** and **SOP-00002** as adopted **Tertiary Instruments** by identifier, version, registry path, and content identifier, together with the ministerial recording pathway needed to anchor those instruments in the **SOP Registry** as the current ratified copies.

## 2. Operative rule

This is normative text proposed for adoption by Governance System. If (and only if) it is adopted, this memorandum and the attached texts listed in §6 are adopted together as one integrated proposal package.

Each attached text is tabled as part of DP-00003 and should be interpreted according to its own class and terms, except that all of them are adopted in one vote and form a single governance record package.

In the event of conflict, this memorandum and the attached texts should be read together narrowly so as to preserve the Protocol IP firewall, lane separation, instrument hierarchy, and the existing limits stated in the Company Agreement and applicable law.

## 3. Definitions

1. **"Company"** means **SOLOMON DAO LLC**.
2. **"Governance System"** means the on-chain mechanism by which this proposal package is adopted and executed.
3. **"Head Steward"** means the then-serving Head Steward of SOLOMON DAO LLC, acting only in the limited representative, statutory-compliance, ministerial, documentary, and notice capacities expressly stated in the Company Agreement and the attached texts.
4. **"Licensing Subcommittee"** means the DAO-side body constituted for Protocol IP licensing matters only.
5. **"Treasury Subcommittee"** means the Company Treasury Subcommittee contemplated by the Company Agreement framework and confirmed for operative use under the attached treasury memorandum, and may be styled **"The Illuminated"** for chamber-identification purposes only.
6. **"Company Treasury Account"** means a Solana account, smart contract, or address designated by Governance System as holding Company property for Company treasury operations and listed in the Smart Contract Registry, consistently with the Company Agreement.
7. **"License"** and **"Licensee"** have the meanings given to them in the IP License Framework.
8. **"Operational Pack"** means the tertiary-instrument ratification memorandum attached to this proposal package and any resulting governance record package described there.
9. **"SOP Registry"** means the Company's canonical record repository designated under the Company Agreement for maintaining adopted instruments, registries, registers, and SOP artefacts.
10. **"Tertiary Instrument"** has the meaning given in the Company Agreement and includes SOPs and related operational artefacts maintained in the SOP Registry.

## 4. Construction and lane separation

This Resolution must be construed narrowly.

1. The **Licensing Subcommittee** is for Protocol IP licensing matters only.
2. The **Treasury Subcommittee** is for designated Company Treasury Account management only.
3. Approval, review, diligence, reporting, notice, certification, or recordkeeping in one lane does not by itself create authority, instruction, attribution, agency, control, or legal effect in another lane.
4. The Licensing Subcommittee may approve, administer, or recommend licenses of **Protocol IP** only. It may not, by reason only of that role, direct, supervise, or control any downstream entity, Licensee, implementer, service provider, or counterparty in relation to licensing strategy, regulatory registration, jurisdictional posture, treasury, implementation or execution, staffing, customer handling, or operations.
5. The Treasury Subcommittee may manage designated Company Treasury Account(s) only. It may not by reason only of that role direct any licensing decision, amend any Primary Instrument, or exercise control over any DAO treasury account that has not been expressly designated as a Company Treasury Account.
6. No attached memorandum creates an unstated permanent office, hidden override right, direct operational mandate, or by-conduct expansion of authority.
7. Nothing in this Resolution or the attached texts authorizes the Company, the Head Steward, the Licensing Subcommittee, or the Treasury Subcommittee to collapse the Protocol IP lane and the treasury lane into a single undifferentiated power center.
8. Unless an attached memorandum or a later valid instrument expressly provides otherwise, any Subcommittee action under this package is collective only and must arise through the valid recorded process applicable to that Subcommittee. No individual member acquires unilateral authority by reason only of Subcommittee service.
9. Service on a Subcommittee, or common status as Members of the Company, does not by itself constitute, evidence, or create a voting agreement, pooling arrangement, coordinated decision-making arrangement, proxy path, nominee path, or other acting-in-concert arrangement.
   Each participating member remains responsible for that person's own separate judgment under the Company Agreement and the applicable instrument.
10. No Operational Pack, registry-linked SOP adoption target, registry entry, or other Tertiary Instrument adopted through this package may amend a Primary Instrument or Secondary Instrument or expand authority beyond what the Company Agreement, applicable law, and any relevant on-chain constraints already permit.
11. No deck, email, chat, summary, issue list, facilitative material, metadata field, registry note, control record, hash anchor, or other partial or transformed output may vary, reinterpret, expand, narrow, or override the adopted text of this package or any higher-precedence instrument.

12. No course of dealing, silence, administrative practice, meeting pattern, facilitation pattern, historical influence, or status-based assumption may create waiver, modification, apparent authority, cross-lane effect, or an expansion of authority under this package.
13. Except to the extent rights are separately created by a valid written agreement or by mandatory law, no service provider, counterparty, payment recipient, holder, or other third party acquires any pass-through, holder-style, transitive, or reliance-based right under this package merely by receiving payment, interfacing with a Company Treasury Account, appearing in a control record, or seeing a public summary, registry entry, or posting.
14. No approval, review, diligence, allowlist, cap, report, recordkeeping step, or treasury-side control under this package shall by itself make the Company, the Head Steward, or any Subcommittee the operator, controller, custodian, compliance principal, or service provider of any downstream implementation, counterparty arrangement, market-facing activity, or settlement rail.

## 5. Posting-time fields

This package intentionally leaves certain execution fields to be filled at posting time or recorded by linked authority evidence, because they are operational details rather than structural drafting questions.

The expected posting-time fields are:

- formation evidence link, registry entry, and or content hash;
- any public Treasury Operating Policy references, confidential parameter-record identifiers or hashes where appropriate, and any reporting cadence or reporting method adopted with the treasury lane;
- registry paths, URLs, hashes, CIDs, commits, or equivalent anchors for the Operational Pack adoption targets; and
- any operational notes needed to identify the movement path from the main DAO treasury into the designated Company Treasury Vault and the intended anchor path for the related Smart Contract Registry update through the SOP Registry.

The absence of a filled posting-time field in this draft does not change the structural rules stated in the attached texts.

## 6. Attached package texts

The following package texts are tabled and adopted as part of DP-00003:

1. **Incorporation Recognition, Governance Acknowledgment, and Marshall Islands Record** `DP-00003_MEM-incorporation-and-recognition.md`
2. **Licensing Subcommittee** `DP-00003_MEM-licensing-subcommittee.md`
3. **Treasury Subcommittee Ratification, Company Treasury Account Designation, and Initial Treasury Transfer** `DP-00003_MEM-treasury-subcommittee-and-transfer.md`
4. **Legal Budget Clarification, Approved Use Expansion, and Spending Boundaries** `DP-00003_MEM-legal-budget-clarification-and-bounded-use.md`
5. **Operational Pack No. 00001: Initial Tertiary Instrument Ratification** `DP-00003_OP-00001-initial-tertiary-instrument-ratification.md`

## 7. Sequencing

The intended sequencing after adoption is:

1. publish or anchor the Company formation evidence in the governance records;
2. treat the incorporation memorandum as the clean governance acknowledgment of formation;
3. treat the licensing memorandum as the standing DAO-side licensing architecture for approval and administration of Company-side Protocol IP licenses only, subject to later appointment records and later ratification pathways where required;
4. treat the treasury memorandum as the treasury activation step, using the designated Squads v4 Company Treasury Vault at `8GVq1srBAZBsCeYpwdKUwEXzDffwAE5xSLWB1ec2gerr`, the stated **3 of 5** control architecture with a backup-only continuity signer subject to a **2 day** timelock, the initial movement path from the main DAO treasury into that vault, the applicable per-period treasury cap on a shared aggregate no-duplication basis across that treasury lane, and the corresponding Smart Contract Registry update to be recorded through the SOP Registry;
5. treat the legal-budget memorandum as the bounded clarification of the DP-00001 Legal Budget so that the same capped wallet may be used for audits, documented payment, settlement, or reimbursement of accrued and unpaid legal and related professional expenses, and other similar DAO-related professional or administrative expenses without becoming an unrestricted general discretionary fund; and
6. treat the Operational Pack as the ratification pathway for **SOP-00001** and **SOP-00002** as identified adoption targets, followed by ministerial recordation or hash anchoring of the ratified copies in the **SOP Registry**.

Nothing in this sequencing creates a condition precedent to the Company's legal existence where the Company Agreement already says the Company exists and is effective upon formation under its own terms.

# 8. Guardrails

**RESOLVED:** Adoption of this omnibus package does not by itself:

- waive or narrow any limit in the Company Agreement;
- create any authority not expressly stated in the attached texts;
- authorize any operational control of any Licensee, service provider, or other downstream entity, or any direction, supervision, or instruction of any Licensee, service provider, or other downstream entity in relation to licensing, registration, treasury, implementation, execution, or operating posture;
- amend the Operating Agreement, Founding Charter, or other Primary Instrument except where a later valid instrument expressly does so;
- use a bundled Operational Pack or other Tertiary Instrument to amend a Secondary Instrument or expand authority beyond the existing hierarchy;
- convert the DP-00001 Legal Budget into an unrestricted general discretionary fund, general operating pool, or open-ended discretionary spend bucket;
- create any broader fiduciary, trust, agency, partnership, custody, or advisory duty by reason only of Subcommittee service, signer status, backup continuity status, draft circulation, or facilitation;
- permit any deck, summary, chat, metadata view, registry note, control record, or other partial output to amend, reinterpret, or override the adopted text or the higher-precedence Company Agreement instruments;
- allow any course of dealing, silence, facilitation pattern, or status-based assumption to create waiver, modification, apparent authority, or cross-lane authority creep;
- create any pass-through, holder-style, third-party, or transitive right under the treasury lane merely by reason of receipt, payment flow, appearance in a control record, or reliance on a public summary or posting; or
- fill the posting-time execution fields that remain blank in this draft.

**Disclaimer (Governance Proposal; No Professional Advice).**

This document is a governance proposal and governance communication. If adopted by the DAO through its governance mechanisms, it may become binding on the DAO and persons exercising authority under the Company Agreement to the extent provided in the Company Agreement and applicable law. This document does not constitute legal, tax, financial, or other professional advice. The author(s) are not acting as legal counsel to the DAO or any member or user. No attorney-client relationship is created.

# DP-00003 (MEM): Incorporation Recognition, Governance Acknowledgment, and Marshall Islands Record

**Status:** Draft (intended for ratification via Governance System as part of The Gigabus Proposal)

**Version:** 1.0.12

**Owner:** SOLOMON DAO LLC (via Governance System)

**Applies to:** DAO governance participants; the Head Steward in the limited recordkeeping and ministerial capacities stated here; and any person reviewing the governance record for evidence of the DAO's post-formation acknowledgment of the Company.

**Effective date:** Upon ratification by Governance System, provided that the Formation Evidence shows that the Company exists as a formed legal person.

**Authority note:** This memorandum is evidentiary and governance-housekeeping in character. It acknowledges formation, records the Company's post-formation footing in the governance record, and confirms how later governance actions should be read. It does not re-form the Company and is not a condition to the legal effectiveness of the Company's formation or of the Company Agreement where those matters are already governed by the Company Agreement and applicable law.

**Confidentiality classification:** Public

**Supersedes:** None

**Related:** the Certificate of Formation or equivalent registry evidence for SOLOMON DAO LLC; the Operating Agreement of SOLOMON DAO LLC; the Founding Charter of SOLOMON DAO LLC; the `compiled-documents/company-agreement` record set, including `Company_Agreement_SOLOMON_DAO_LLC_IND-index.md`; and the full DP-00003 memorandum.

---

## Intellectual Property Firewall

**"Protocol"** in this Resolution has the same meaning as **"Protocol IP"** as defined in the Company Agreement of SOLOMON DAO LLC (Operating Agreement §2.1(17)) — design, documentation, code, repositories, and other intellectual property. It does not mean an operating business, service, issuer, custodian, counterparty, or other person or entity.

Nothing in this Resolution authorizes the Company, the Head Steward, or any Subcommittee to direct, supervise, or control the operations of any Licensee, counterparty, service provider, or other person. Any external obligations arise only under the applicable License or other written agreement, and only to the extent expressly stated there.

## 1. Purpose

This memorandum does nine things.

1. It records the DAO's on-chain acknowledgment that **SOLOMON DAO LLC** has been validly formed in the Republic of the Marshall Islands and exists as a separate legal person under the applicable Marshall Islands framework.
2. It records, for governance-traceability purposes, that the Company Agreement takes effect according to its own terms and that later governance actions are being taken on that post-formation footing.
3. It confirms that this governance acknowledgment is supplementary evidence only and does not imply that Member assent was absent or incomplete merely because the Company's legal formation occurred through registrar filing rather than by a later separate on-chain vote.
4. It gives a formal governance-side acknowledgment to the Republic of the Marshall Islands and to the legal framework under which the Company is able to exist and operate.
5. It records how the governance record should read the relationship between the Company, the Governance System, the Protocol IP licensing lane, the treasury lane, and persons participating in governance, including the limited significance of ministerial and administrative roles.
6. It confirms that, where the Company later takes any act through a valid instrument, process, or authority pathway, it does so in its own name, right, capacity, and authority, and not merely as a deemed extension of governance participation, tokenholding, reporting links, or any other lane.
7. It confirms that outputs generated in one lane of authority are not to be treated as having direct effect in another lane absent a separate valid act taken in the relevant name, capacity, and authority.
8. It records that DAO participation, tokenholding, economic alignment, reporting links, shared personnel, ministerial coordination, service-provider overlap, and similar facts do not by themselves create transitive, derivative, pass-through, third-party-beneficiary, holder-style, or look-through rights in respect of the Company, its property, its offices, its treasury, the Protocol IP, or downstream operating activity.
9. It confirms that this memorandum is interpretive, evidentiary, and governance-housekeeping in character only, and does not re-form the Company, enlarge any office, or concede any treatment beyond what mandatory law validly requires on the actual facts.

## 2. Definitions

1. **"Company"** means **SOLOMON DAO LLC**.
2. **"Company Agreement"** means the Operating Agreement, the Founding Charter, and the other instruments comprising the Company Agreement under their own terms.
3. **"Effective Formation Date"** means the date and time on which the Company came into legal existence according to the Certificate of Formation or other applicable registry evidence.
4. **"Formation Evidence"** means the Certificate of Formation, registrar entry, certified copy, filing evidence, or equivalent documentary record showing that the Company exists as a formed legal person.
5. **"Governance System"** has the meaning given to that term in the Company Agreement. For purposes of this memorandum, references to adoption or execution through the Governance System refer to the use of that Governance System in connection with this proposal package.
6. **"Head Steward"** means the then-serving person designated under the Company Agreement as the Company's administrative steward and point of contact, being the Representative Agent and Senior Managing Official and, where Category C applies and the designation and admission described in Operating Agreement §8.4(2) have occurred, the Company's authorized representative member solely for BOIR/Form 2 Category C and related statutory reporting.
7. **"Marshall Islands Framework"** means the Marshall Islands DAO Act, DAO Regulations, the applicable provisions of the Marshall Islands LLC Act, and the registrar-side filing and record framework applicable to the Company as a Marshall Islands DAO LLC.
8. **"Protocol IP"** has the meaning given to that term in the Company Agreement.

# 3. Recognition of formation, status, and legal personality

## 3.1 Recognition of the Company

**RESOLVED:** The DAO acknowledges and records that the Company has been formed as **SOLOMON DAO LLC**, a Marshall Islands DAO LLC, upon the issuance or effectuation of the relevant Formation Evidence.

## 3.2 Separate legal personality and limited liability

**RESOLVED:** The DAO further acknowledges and records that, upon the Effective Formation Date, the Company came into existence as a separate legal person under the laws of the Republic of the Marshall Islands, with its own legal personality, statutory status, rights, powers, property, liabilities, and limited-liability footing under applicable law and the Company Agreement.

## 3.3 Effective footing of the Company Agreement

**RESOLVED:** The DAO further acknowledges and records that the Company Agreement takes effect according to its own terms and applicable law, including the provisions stating that the Company's formation and the effectiveness of its primary instruments arise by reference to formation and not by reference to a later ratification vote.

## 3.4 No re-formation or re-approval fiction

**RESOLVED:** This memorandum does not purport to re-form the Company, to retroactively create the Company, or to imply that the Company's existence or the effectiveness of the Company Agreement depended on a later governance vote where the governing instruments already provide otherwise.

# 4. Governance-side acknowledgment of Company and Member footing

## 4.1 Post-formation governance footing

**RESOLVED:** For governance-record purposes, the DAO acknowledges that all post-formation governance participation, proposals, votes, execution bundles, Subcommittee activity, register maintenance, and other Company-facing governance acts proceed on the footing that the Company exists and that the Company Agreement governs the rights, limits, and authorities relevant to such acts.

## 4.2 Separate-person reading for governance purposes

**RESOLVED:** For purposes of the Company's internal records and governance architecture, the Company, the Governance System, and the persons participating in governance are to be read as distinct persons and capacities. Participation in governance, voting, proposal activity, Subcommittee service, or limited delegated execution does not by itself make any such person the Company, a general agent of the Company, a partner or joint venturer of the Company, or a person with general authority to bind the Company.

**RESOLVED:** Where the Company later validly takes any act, including entering into an agreement, granting or receiving rights, maintaining a register, publishing a notice, holding property, recognizing a role, or otherwise acting under the Company Agreement or applicable law, that act is to be read as an act of the Company in its own name, right, capacity, and authority, and not as a deemed act of Members, tokenholders, governance participants, service providers, or any other person merely by reason of governance participation, economic alignment, reporting links, or other association.

## 4.3 Separate interpretive lanes

**RESOLVED:** For governance-record and interpretive purposes, the Company lane, the Governance System lane, the Protocol IP licensing lane, and any downstream implementation, treasury, or other operating lane are separate lanes and are to be read separately unless a governing instrument expressly provides otherwise.

**RESOLVED:** Participation in one such lane, including governance participation, proposal activity, Subcommittee service, recordkeeping, reporting, ministerial execution, licensing-related activity, or treasury-related activity, does not by itself constitute participation, authority, control, agency, operational status, or recourse rights in any other lane.

## 4.4 No inference from governance participation alone

**RESOLVED:** Participation in the Governance System, including voting, proposing, discussing, serving in a Subcommittee, coordinating the execution of adopted resolutions, or acting within a limited delegated remit under the Company Agreement, shall not by itself be read as establishing common control, centralized management, or, absent additional legally operative facts, an agreement to act in concert.

### 4.5 No direct effect outside a valid pathway

**RESOLVED:** No proposal, vote, memorandum, notice, register entry, Subcommittee act, Head Steward act, filing act, recordkeeping act, hash-anchor, repository entry, metadata entry, summary, extract, or other governance-side output shall by itself constitute or effect any grant, amendment, revocation, administration, enforcement, or oversight of any licence of Protocol IP, any treasury instruction, any transfer or movement of Company property, any downstream operational instruction, any contractual commitment, or any other act outside the governance lane.

**RESOLVED:** Any such effect, and any act of the Company in its own right, must arise, if at all, through a separate valid act taken by the Company or by the relevant person or body in its own name, capacity, and authority under the Company Agreement and applicable law.

### 4.6 No transitive, pass-through, or holder-style rights from participation alone

**RESOLVED:** Neither DAO participation, tokenholding, governance participation, economic alignment, reporting links, shared personnel, ministerial coordination, service-provider overlap, nor any similar relationship shall by itself create any transitive, derivative, pass-through, privity-through, third-party-beneficiary, holder-style, look-through, beneficial, enforcement, agency, operational, or other right in respect of the Company, its property, its offices, its treasury, the Protocol IP, any agreement or instrument entered into by the Company, or any downstream person, activity, or implementation.

### 4.7 References and identifiers are recordkeeping only

**RESOLVED:** References in the governance record to the Company, the Company Agreement, the Protocol IP, any licence, any treasury account, any wallet, address, domain, URL, repository, identifier, register item, agreement, implementation artefact, or similar reference are for governance, provenance, registry, diligence, notice, or recordkeeping purposes only unless a governing instrument expressly provides otherwise.

**RESOLVED:** No such reference, identifier, listing, summary, extract, or descriptive label shall by itself be used to attribute operational activity to the Company, to attribute Company activity to another person, to widen the Company's role, to create recourse or reliance rights, or to override the actual legal effect of the underlying instrument or facts.

### 4.8 No later argument from silence

**RESOLVED:** The DAO records that the absence of an earlier standalone on-chain acknowledgment of formation shall not by itself be used as a basis to argue that the Members did not agree to the Company existing, did not agree that governance would proceed through the formed Company, or did not agree that the Company Agreement governs post-formation Company affairs to the extent stated in the Company Agreement and applicable law.

### 4.9 Supplementary record only

**RESOLVED:** This Section 4 is supplementary and evidentiary only. It does not enlarge Member rights, reduce mandatory-law limits, or override the actual formation mechanics, admission mechanics, algorithmic-management allocation, delegated-authority structure, or other authority limits stated in the Company Agreement and applicable law.

# 5. Formation evidence and recordkeeping

## 5.1 Publication or anchoring of formation evidence

**RESOLVED:** The Head Steward may publish, link, hash-anchor, or otherwise record the Formation Evidence in the governance records, proposal repository, SOP Registry, the `compiled-documents/company-agreement` record set, or other appropriate Company record pathway.

**RESOLVED:** For public recordkeeping purposes, the Formation Evidence may be evidenced by reference to the `compiled-documents/company-agreement` record set, including `Company_Agreement_SOLOMON_DAO_LLC_IND-index.md`, where the clean compiled reading copy and the filed, stamped, certified, and related Marshall Islands return documents are indexed together.

**Posting-time field:**

- formation evidence link, index link, and or hash: `index: https://github.com/SolomonDAOrg/compiled-documents/blob/main/company-agreement/Company *Agreement*SOLOMON*DAO*LLC_IND-index.md **|** commit: d3e6999a5edd2413857516f450c90faab60fa5b9`

## 5.2 Scope of Head Steward role

**RESOLVED:** Any act by the Head Steward under §5.1 is ministerial, documentary, recordkeeping, and statutory-compliance in character only. It does not create any broader discretionary authority, separate management office, centralized-management role, or general management authority. No use of the titles Head Steward, Representative Agent, Senior Managing Official, or authorized representative member in connection with such acts shall by itself imply discretionary managerial control over the Company, the Governance System, Protocol IP, or Company Treasury Accounts.

## 5.3 No expansion by course of dealing

**RESOLVED:** No pattern of filings, signatures, document circulation, recordkeeping, publication, coordination, contact with service providers, transparency reporting, registry interaction, or other course of dealing by or through the Head Steward, the Representative Agent, the Registered Agent interface, any Senior Managing Official designation, or any authorized representative member designation shall be used or relied upon to widen any such role into discretionary management, centralized management, operational control, general agency, or general authority to bind the Company.

## 5.4 Redactions and controlled copies

**RESOLVED:** If a certified copy, filing packet, or registry extract contains personal information, security-sensitive information, or other matter reasonably requiring controlled handling, the Head Steward may record an appropriate summary, certified note, or hash commitment instead of unrestricted public disclosure, provided the governance record still preserves a clear evidence trail.

## 5.5 No decontextualization of evidence or record outputs

**RESOLVED:** Formation Evidence, certified notes, summaries, extracts, redacted copies, hashes, repository records, stitched packs, schema-native records, machine-readable outputs, metadata views, registry extracts, or other renderings of governance or formation materials are evidentiary and recordkeeping conveniences only. None of them has interpretive or substantive effect apart from the underlying executed text or underlying legal fact to which it relates.

**RESOLVED:** No such rendering, extract, field output, metadata item, or partial record may be used to decontextualize this memorandum, the Company Agreement, or the Formation Evidence, or to vary, reinterpret, expand, narrow, or override the underlying executed text, the underlying legal status of the Company, or the limited character of the roles referenced in those materials.

## 5.6 Underlying instruments and facts control

**RESOLVED:** If any presentational, structural, metadata-level, registry-level, or transformation-level element of a governance record, repository view, summary, stitched pack, machine-readable record, or other rendering conflicts with the underlying executed text of the Company Agreement, the text of this memorandum, the Formation Evidence, or the underlying legal fact of formation, the underlying executed text and underlying legal fact control.

# 6. Acknowledgment of the Marshall Islands framework

## 6.1 Recognition of the Republic of the Marshall Islands

**RESOLVED:** The DAO acknowledges with respect the Republic of the Marshall Islands as the sovereign jurisdiction under whose laws the Company has been formed and under whose legal framework the Company is recognized as a Marshall Islands DAO LLC.

## 6.2 Recognition of the legal framework

**RESOLVED:** The DAO further acknowledges the Marshall Islands Framework as the legal basis under which the Company is able to exist, maintain a Representative Agent, satisfy filing and recordkeeping requirements, allocate governance, decision-making, and delegated authority through its governing instruments and Governance System, and operate its governance architecture as a Marshall Islands DAO LLC.

## 6.3 Limited significance of ministerial and administrative roles

**RESOLVED:** Ministerial, administrative, documentary, statutory-contact, filing, recordkeeping, transparency-reporting, or similarly limited authority conferred under the Company Agreement or the Marshall Islands Framework, including on the Head Steward, the Representative Agent, the Registered Agent interface, any Senior Managing Official designation, any authorized representative member designation for BOIR/Form 2 Category C or similar reporting purposes, or any person acting within a validly delegated remit, does not by itself constitute centralized management, does not by itself render the Company manager-managed or otherwise centrally managed by a natural person, and does not by itself create broader agency, discretionary managerial authority, operational control, beneficial ownership, recourse rights, or attribution beyond the express scope of the applicable instrument and the actual facts. For avoidance of doubt, any Senior Managing Official designation or authorized representative member designation for BOIR/Form 2 Category C or similar statutory reporting purposes is used solely for statutory reporting, transparency, filing, or registry-contact mechanics and shall not be read as evidence that the Company is centrally managed, manager-managed by a natural person, or otherwise controlled by reason only of that designation.

## 6.4 No concession of disregard, recharacterization, or look-through

**RESOLVED:** Nothing in this memorandum, the Company Agreement, or the governance record concedes that any authority may disregard the Company's separate legal existence, limited liability, or statutory status, recharacterize the Company or its roles contrary to the governing instruments, or apply look-through, attribution, or similar treatment beyond what mandatory law validly requires on the actual facts.

## 6.5 No extraterritorial implication

**RESOLVED:** This acknowledgment is descriptive, respectful, and interpretive in character. It does not create any implied waiver, submission, representation, or other legal consequence beyond what already arises under applicable law and the Company Agreement.

# 7. Guardrails and interpretation

## 7.1 Narrow reading

**RESOLVED:** This memorandum shall be read narrowly as a clean governance acknowledgment and evidence record, not as a rewrite of the Company's formation mechanics or a free-standing grant of authority.

## 7.2 No enlargement of powers, duties, or recourse

**RESOLVED:** Nothing in this memorandum waives, narrows, or overrides any existing limit in the Company Agreement concerning the Head Steward's role, the Representative Agent's role, the Senior Managing Official reporting construct, any authorized representative member designation, Member admission, algorithmic management, no-agency language, no-partnership language, no-apparent-authority limitations, no-oral-modification language, no-estoppel language, no-pass-through or no-third-party-rights language, confidentiality protections, controlled-document hierarchy, or mandatory-law supremacy.

## 7.3 No implied rights or reliance basis

**RESOLVED:** Nothing in this memorandum creates by implication any third-party-beneficiary status, privity-through claim, holder-style claim, reliance basis, general recourse pathway, or implied covenant in favour of any person not otherwise entitled under the Company Agreement or applicable law.

## 7.4 Accuracy and non-evasion

**RESOLVED:** This memorandum is adopted to acknowledge and accurately describe the Company's Marshall Islands legal footing and governance architecture. It shall not be construed to disguise centralized control where such control in fact exists, to enlarge any office or delegated role beyond the governing instruments, or to evade any mandatory law validly applicable on the facts.

## 7.5 If inconsistency emerges

**RESOLVED:** If a provision of this memorandum is reasonably read in more than one way, the interpretation that better preserves the Company's existing legal formation, the Company's separate legal status, the principle that the Company, where it validly acts, acts in its own name, right, capacity, and authority, the limited role of ministerial and administrative actors, the separation of the relevant governance, licensing, treasury, and operating lanes, the algorithmic-management structure of the Company, and the evidentiary-only nature of this memorandum shall prevail.

**Disclaimer (Governance Proposal; No Professional Advice).**

This document is a governance proposal and governance communication. If adopted by the DAO through its governance mechanisms, it may become binding on the DAO and persons exercising authority under the Company Agreement to the extent provided in the Company Agreement and applicable law. This document does not constitute legal, tax, financial, or other professional advice. The author(s) are not acting as legal counsel to the DAO or any member or user. No attorney-client relationship is created.

You must obtain your own independent advice for your circumstances.

# DP-00003 (MEM): Licensing Subcommittee

**Status:** Draft (intended for ratification via Governance System as part of The Gigabus Proposal)

**Version:** 1.0.12

**Owner:** SOLOMON DAO LLC (via Governance System)

**Applies to:** DAO governance participants; any later appointed Licensing Subcommittee members; the Head Steward acting only within any limited ministerial execution role expressly stated here; and any counterparty, licensee, implementer, service provider, counsel, or adviser receiving or reviewing Company-side licensing materials under this memorandum.

**Effective date:** Upon ratification by Governance System.

**Authority note:** This memorandum establishes the DAO-side Licensing Subcommittee as the Company's internal body for Protocol IP licensing matters and ties that body directly into the then-effective IP License Framework, Intellectual Property Registry, IP License & Assignment Register, Counterparty Agreements Register, and SOP Registry architecture. It does not transfer title to Protocol IP, does not make the Company an operator of any licensee business, does not authorize the Licensing Subcommittee to direct any downstream opco, licensee, or implementer on registration, licensing posture, compliance posture, or operations, does not collapse the licensing lane into the treasury lane or any downstream operating lane, and does not create standing discretionary power in the Head Steward beyond the narrow execution pathway expressly stated here.

**Confidentiality classification:** Public (counterparty details, legal packages, and implementation particulars may be handled under appropriate confidentiality controls)

**Supersedes:** None

**Related:** the Founding Charter of SOLOMON DAO LLC; the Operating Agreement of SOLOMON DAO LLC;

the IP License Framework and any approved license package forms or schedules; the Intellectual Property Registry; the IP License & Assignment Register; the Counterparty Agreements Register; any later appointment record for specific natural persons to the Licensing Subcommittee; and the full DP-00003 memorandum.

---

## Intellectual Property Firewall

**"Protocol"** in this Resolution has the same meaning as **"Protocol IP"** as defined in the Company Agreement of SOLOMON DAO LLC (Operating Agreement §2.1(17)) — design, documentation, code, repositories, and other intellectual property. It does not mean an operating business, service, issuer, custodian, counterparty, or other person or entity.

Nothing in this Resolution authorizes the Company, the Head Steward, or any Subcommittee to direct, supervise, or control the operations of any Licensee, counterparty, service provider, or other person. Any external obligations arise only under the applicable License or other written agreement, and only to the extent expressly stated there.

# 1. Purpose

This memorandum does two things.

1. It establishes the **Licensing Subcommittee** as the DAO's internal body for Protocol IP licensing matters.
2. It adopts the delegated authority limits, execution pathway, eligibility rules, external-review tools, procedure, recordkeeping obligations, and term limits governing that body within the already existing licensing framework.

## 2. Operative rule

This is normative text proposed for adoption by Governance System. If and only if it is adopted, the operative clauses below are effective according to their terms.

This memorandum is intended to be read together with the Company Agreement, including the Founding Charter, Operating Agreement, and any then-effective IP License Framework. In the event of conflict, the higher-ranking Company Agreement instrument controls.

This memorandum forms part of the integrated Company governance record and must be read subject to the Company Agreement hierarchy. No deck, email, chat, issue list, facilitative note, excerpt, summary, metadata field, register item, control record, hash anchor, or machine-readable or transformed rendering may vary, reinterpret, expand, narrow, or override this memorandum or any higher-precedence instrument.

## 3. Definitions

1. **"Company"** means **SOLOMON DAO LLC**.
2. **"Governance System"** means the on-chain mechanism by which this proposal package is adopted and executed.
3. **"Head Steward"** means the then-serving Head Steward of SOLOMON DAO LLC, acting only in the limited capacity stated in the Company Agreement and this memorandum.
4. **"Implementation"** has the meaning given in the Company Agreement and includes any deployment, instantiation, interface, integration, runtime environment, or operational stack that embodies, uses, or interfaces with Protocol IP.
5. **"IP License Framework"** means the then-effective primary instrument, framework, and related approved forms, packages, schedules, register architecture, and recording discipline governing licensing of Protocol IP by the Company.
6. **"Licensing Matter"** means Protocol IP licensing matters only, including:

    - review of proposed licensees, counterparties, and permitted scope of use;
    - review, recommendation, approval, administration, amendment, narrowing, revocation, reassignment, termination, or enforcement of licenses of Protocol IP;
    - review and administration of related assignment, contribution, provenance, and pre-existing-rights provisions where contemplated by the IP License Framework;
    - maintenance of licensing-side registers, records, and package metadata;
    - DAO-side circulation, publication, or handling of licensing-side materials for licensing purposes only; and
    - other DAO-side acts expressly confined to the Protocol IP licensing lane and not to the treasury lane or any downstream operating lane.

    For clarity, a Licensing Matter does **not** include directing or managing any downstream entity's corporate formation, regulatory registration, licensing application, jurisdictional posture, operating model, customer or counterparty handling, treasury, staffing, bookkeeping, compliance operations, or runtime implementation choices.
7. **"Licensing Subcommittee"** means the Subcommittee established under §4 of this memorandum.
8. **"Material Licensing Action"** means any of the following:

    - grant of a new license of Protocol IP;
    - material amendment, narrowing, expansion, reassignment, suspension, revocation, or termination of a license;
    - approval of a new or materially updated form package, schedule architecture, or category of license to be used by the Company;

- acceptance by the Company of any material assignment or vesting of works into Company ownership under the IP License Framework; or
- any other licensing-side act reasonably likely to have significant legal, regulatory, strategic, reputational, or economic effect on the Company.

9. **"Ministerial Execution Step"** means signature, certificate delivery, notice delivery, register entry, compliance confirmation, filing, counterpart circulation, or other documentary or administrative act that carries into effect a licensing action already validly approved under this memorandum or later governance action, without independent discretion to alter its substance.
10. **"Professional Determination"** means a written opinion, attestation, certification, notarial act, witnessing record, commercial-equivalence assessment, or similar written determination prepared by external counsel, a notary, or another appropriately qualified independent professional on the basis of facts and documents presented to that person.

# 4. Establishment of the Licensing Subcommittee

## 4.1 Establishment

**RESOLVED:** The DAO hereby establishes the **Licensing Subcommittee** as the Company's valid internal body for Licensing Matters only.

## 4.2 Licensing-only mandate

**RESOLVED:** The Licensing Subcommittee is constituted solely for the Protocol IP licensing lane and may address Licensing Matters only.

## 4.3 No treasury or downstream operating effect

**RESOLVED:** No act, recommendation, notice, certificate, record, or other output of the Licensing Subcommittee shall have any effect in the treasury lane or in any downstream board, management, or operational process, except as expressly provided in a separate valid instrument or later governance action.

# 5. Scope, powers, and limits of the Licensing Subcommittee

## 5.1 Permitted scope

**RESOLVED:** Subject to this memorandum, the Company Agreement, and any then-effective IP License Framework, the Licensing Subcommittee may:

1. receive, review, organize, and evaluate proposed Licensing Matters;
2. prepare and approve license packages, schedules, notices, side letters, amendments, assignments, or related documentation within the boundaries of the IP License Framework and any approved forms or package architecture;
3. approve or recommend approval of licenses of Protocol IP on behalf of the Company within the delegated scope stated in this memorandum;
4. approve or recommend amendment, narrowing, suspension, revocation, reassignment, or termination of licenses where permitted by the Company Agreement and the relevant license package;
5. coordinate with legal counsel, compliance providers, diligence providers, and counterparties as reasonably necessary for lawful licensing activity;
6. receive, review, organize, and rely in good faith on Licensee Declarations, package schedules, Public Record entries, hash commitments, and Confidential Particulars maintained under the licensing architecture, without dictating or directing the content of any Licensee Declaration;
7. require that Company-side license packages accurately allocate responsibility for downstream operations, registrations, compliance decisions, implementations, and business conduct to the relevant downstream party and not to the Company;
8. maintain or cause maintenance of the Intellectual Property Registry, the IP License & Assignment Register, the Counterparty Agreements Register, and associated SOP Registry records for licensing-side actions;
9. issue DAO-side recommendations, certificates, and confirmations relating to Licensing Matters;
10. seek, receive, and rely in good faith on one or more Professional Determinations for a proposed licensing package or related record; and
11. take other DAO-side procedural, documentary, or administrative acts confined to Licensing Matters and consistent with this memorandum.

## 5.2 Core licensing guardrails

**RESOLVED:** Any licensing action taken or approved by the Licensing Subcommittee must:

- preserve the Company's ownership of Protocol IP unless later governance action expressly approves a different disposition in the manner required by the Company Agreement;
- allocate responsibility for legal and regulatory compliance in relation to the licensee's own deployments, operations, counterparties, users, customers, treasury, custody, staffing, jurisdictions, registrations, and operating choices to the licensee or other relevant downstream party, not to the Company;
- make clear that any conditions, covenants, restrictions, undertakings, diligence items, or documentary requirements in a Company-side license package are contractual allocation and recordkeeping tools only and do not by themselves constitute downstream operational direction, supervisory instruction, or agency;
- avoid framing the Company as operator, administrator, issuer, custodian, manager, agent, partner, fiduciary, joint venturer, or supervisor of the licensee's business;
- remain consistent with the IP License Framework and any approved licensing package architecture then in force; and
- be recorded in the applicable Company registers and records in accordance with §10.

## 5.3 Express exclusions

**RESOLVED:** The Licensing Subcommittee may not, by reason only of this memorandum:

- operate, control, administer, maintain, or support any Implementation, service, product, deployment, or licensee business;
- direct, require, approve in an operational capacity, or otherwise control any downstream opco, licensee, or implementer in relation to corporate formation, regulatory registration, licensing applications, jurisdictional exclusions or inclusions, treasury, customer handling, staffing, compliance operations, or day-to-day business conduct;
- amend the Operating Agreement, Founding Charter, or any other Primary Instrument;
- change the structure of the IP License Framework except through the manner required for the relevant instrument;
- exercise treasury authority except where a later governance action expressly authorizes a narrow treasury-related step connected to a license arrangement;
- create any entitlement in the Company, its Members, or any third party to the licensee's revenues, profits, assets, or operational data except as expressly documented in a valid license package and permitted by the Company Agreement;
- create agency, partnership, fiduciary status, employment, co-management, supervisory responsibility, or operational attribution by wording or course of action.

## 5.4 Framework and register integration

**RESOLVED:** The Licensing Subcommittee shall operate by direct reference to and in a manner consistent with the then-effective licensing architecture, including as relevant:

- the IP License Framework as the governing primary instrument for Protocol IP licensing;
- the Intellectual Property Registry as the canonical list of Protocol IP and Marks owned or controlled by the Company;
- the IP License & Assignment Register as the canonical record of outbound licenses, inbound licenses, assignments, revocations, and Licensee Declaration schedules;
- the Counterparty Agreements Register as the canonical index of agreements, amendments, side letters, joinders, accessions, and terminations involving external counterparties; and
- the SOP Registry as the repository for recorded package identifiers, approvals, hashes, confidential handling procedures, and related governance traceability.

A licensing package may use Public Record and Confidential Particulars splitting, hash commitments, placeholder entries, and other confidentiality mechanics contemplated by the Company Agreement instruments. The Licensing Subcommittee may rely on those mechanics and is not required, by reason only of this memorandum, to force public disclosure of confidential counterparty particulars or non-public package terms except where mandatory law requires otherwise.

# 6. Approval, delegation, and execution pathway

## 6.1 Delegated approval authority

**RESOLVED:** Subject to §5 and §6.2, the Licensing Subcommittee may approve Material Licensing Actions on behalf of the Company where:

- the action is permitted by the Company Agreement and the then-effective IP License Framework;
- the action uses an approved form, package architecture, or parameter set, or any deviation is non-material and documented on a written record;
- the action does not amend a Primary Instrument;
- the action does not transfer title to Protocol IP except as already contemplated by the IP License Framework for vesting of Company-owned works or other approved inbound assignments to the Company;
  and
- the action is recorded and later submitted for ratification or reporting to the extent required by the Company Agreement.

## 6.2 Matters reserved for later governance action

**RESOLVED:** Unless later governance action expressly provides otherwise, the Licensing Subcommittee may not finally approve on delegated authority alone:

- a material rewrite of the Company's standard licensing architecture;
- an exclusive, perpetual, or structurally unusual license materially outside the approved package architecture then in force;
- any transaction whose primary effect is a disposal of Company-owned Protocol IP rather than a license of it;
- any action that would materially recharacterize the Company as operator, controller, or primary implementation principal; or
- any action expressly reserved to governance under the Company Agreement or the then-effective IP License Framework.

## 6.3 Ministerial execution by signatory

**RESOLVED:** A licensing action validly approved by the Licensing Subcommittee or by later governance action may be carried into effect through Ministerial Execution Steps performed by:

- the Head Steward; or

- another signatory or representative specifically designated on a written record by the Licensing Subcommittee or later governance action.

Any such person acts only in a ministerial and documentary capacity for that approved licensing action and acquires no independent discretion to alter its substance or to create a broader office or standing mandate.

## 6.4 Certificates and confirmations

**RESOLVED:** For licensing-side counterparty, diligence, and compliance purposes only, the Licensing Subcommittee or an authorized ministerial signatory may issue written certificates or confirmations stating that:

- this memorandum was adopted;
- the Licensing Subcommittee was validly constituted and validly acted within its mandate;
- a specified licensing package was approved within delegated authority or by later governance action; and
- the signatory is authorized to carry out the relevant Ministerial Execution Step.

## 6.5 Professional determinations, opinions, and attestations

**RESOLVED:** The Licensing Subcommittee may, but is not required to, obtain or require one or more Professional Determinations in connection with a proposed licensing package, amendment, assignment, side letter, or related record.

A Professional Determination may address, by way of example only:

- whether the package is, on the facts and documents presented, consistent with the IP License Framework and this memorandum;
- whether the economic terms appear substantially equivalent to commercial terms and do not appear to provide preferential treatment to the relevant counterparty;
- whether signatory authority, execution formalities, witnessing, notarization, or evidentiary steps appear sufficient for the intended record or jurisdictional use; or
- whether a proposed package structure, confidentiality split, or register pathway appears supportable on the facts presented.

Any such determination may be recorded as a confidential opinion, certificate, memorandum, or attached schedule, may be referenced by package identifier or hash commitment, and may be used for evidentiary, notarization, diligence, or file-support purposes.

The Licensing Subcommittee may rely in good faith on a Professional Determination without thereby delegating governance authority to the adviser or creating any duty to obtain one for every package.

A Professional Determination is limited to the facts and documents presented, does not convert the adviser into a manager of the Company or the licensee, and does not itself approve a licensing action unless the Company body with authority has separately approved that action.

## 6.6 No single-person licensing authority

**RESOLVED:** No single person, including the Head Steward, may by reason only of this memorandum unilaterally originate, approve, amend, revoke, or terminate a Material Licensing Action.

## 6.7 Instrument hierarchy and controlling texts

**RESOLVED:** This memorandum must be read as part of the Company Agreement hierarchy and together with the Operating Agreement, the Founding Charter, the IP License Framework, the applicable registry structure, and any later valid Resolution. If any inconsistency appears, the higher-precedence instrument controls to the extent of the inconsistency.

**RESOLVED:** No deck, email, chat, issue list, facilitative note, excerpt, summary, metadata field, register entry, package index, or machine-readable or transformed rendering may vary, reinterpret, expand, narrow, or override this memorandum or any higher-precedence instrument.

## 6.8 No informal amendment; no waiver by conduct

**RESOLVED:** No oral statement, informal understanding, silence, course of dealing, administrative accommodation, historical practice, or unilateral administrative act shall amend, supplement, waive, override, or disapply this memorandum or any limit stated in it.

**RESOLVED:** Any waiver or variation must be express, specific, in writing, and adopted by the person or body having authority under the Company Agreement to grant it.

**RESOLVED:** No person may rely on waiver, estoppel, acquiescence, apparent modification, quasi-estoppel, or similar doctrine merely by reason of conduct, custom, silence, facilitation, or administrative practice to widen Licensing Subcommittee authority, bypass collective approval requirements, or collapse the licensing lane into the treasury lane or any downstream operating lane, except to the extent mandatory law does not permit that exclusion.

## 6.9 No status-based or practical apparent authority

**RESOLVED:** No Licensing Subcommittee member, Head Steward, founder, organizer, adviser, service provider, counterparty-facing contact, or other person has apparent or implied authority in the licensing lane merely by reason of title, access, historical involvement, public association, document custody, communications access, negotiation familiarity, or practical influence.

**RESOLVED:** Any person dealing with the licensing lane must look to the Company Agreement, this memorandum, valid collective approvals, the applicable package, and the authoritative registers and records, and not to informal indications, role descriptions, public assumptions, or prior practice alone.

## 6.10 No decontextualization; no transitive or holder-style rights

**RESOLVED:** This memorandum, any licensing package, and any related summary, certificate, registry entry, evidentiary anchor, or record output remain part of an integrated governance and contractual record and may not be presented or relied upon as a standalone source of broader authority divorced from the Company Agreement hierarchy and the underlying written instruments.

**RESOLVED:** Except to the extent rights are separately created by a valid written agreement or by mandatory law, no licensee, implementer, service provider, counterparty, holder, or other third party obtains any right, recourse, reliance basis, enforcement position, or pass-through benefit under this memorandum merely by reason of appearing in a register, receiving a certificate, seeing a public summary or posting, or interfacing with a Company-side licensing process.

# 7. Confidentiality, diligence, and capacity discipline

## 7.1 Confidential handling

**RESOLVED:** Subject to mandatory law and later governance action, the composition, internal procedures, deliberations, voting breakdowns, legal materials, draft packages, diligence materials, negotiation notes, and internal records of the Licensing Subcommittee may be treated as Company Confidential Information or Privileged Internal Information where applicable.

## 7.2 No waiver or read-through

**RESOLVED:** Disclosure of licensing-side materials to the Licensing Subcommittee, the Company, legal counsel, compliance providers, auditors, or other authorized reviewers does not by itself waive privilege or confidentiality as to any other person, does not create Member-wide access, and does not create constructive knowledge, control, operational responsibility, or attribution in relation to any licensee or Implementation.

## 7.3 Diligence is licensing-side only

**RESOLVED:** Review, diligence, package preparation, conditions precedent, covenants, Professional Determinations, monitoring rights, or documentary requests used in the licensing lane are protective, contractual, and governance measures only. They do not by themselves make the Company the operator, controller, compliance principal, or directing mind of the licensee's business, and they do not by themselves convert a Company-side IP license into a downstream operating instruction.

## 7.4 Licensee self-declaration discipline

**RESOLVED:** Where a licensing package includes a Licensee Declaration or related self-declared territorial, activity, regulatory, or use-case parameters, the Licensing Subcommittee may review that material for record completeness, internal consistency, and package readiness, but may not by reason only of this memorandum dictate, script, or operationally direct the content of the Licensee's self-declared posture. Differences between Licensee Declarations of different licensees do not imply Company direction, control, orchestration, or standardized downstream operating instructions.

## 7.5 No downstream direction or automatic cross-lane effect

**RESOLVED:** No act, recommendation, notice, condition, covenant, certificate, diligence request, register entry, or other output of the Licensing Subcommittee shall by itself:

- require any downstream entity to adopt a particular regulatory, licensing, or registration path;
- require any downstream entity to seek, maintain, or surrender any permit, approval, opinion, or external service arrangement;
- constitute treasury instruction, downstream board instruction, or downstream management instruction; or
- create any automatic effect in the treasury lane or in any downstream board, management, or operational process.

Any downstream entity must make its own lawful decisions, under its own organs and advisers, in its own name and on its own responsibility.

# 8. Composition, eligibility, and term limits

## 8.1 Size

**RESOLVED:** The Licensing Subcommittee shall consist of not fewer than three (3) and not more than five (5) members unless later governance action expressly provides otherwise.

## 8.2 Eligibility

**RESOLVED:** Only Members of SOLOMON DAO LLC may serve on the Licensing Subcommittee unless later governance action expressly provides otherwise.

A person is ineligible to serve, and must cease serving if already appointed, if that person:

- is not then a DAO Member;
- is subject to a conflict, legal restriction, or other disqualification that later governance action validly adopts for licensing purposes; or
- is otherwise ineligible under the Company Agreement or applicable law.

## 8.3 Initial appointments

**RESOLVED:** Specific natural persons may be appointed to the Licensing Subcommittee by later governance action or by a later appointment record validly adopted under DAO process.

Until such appointments are made, this memorandum establishes the Subcommittee framework and authority architecture only.

## 8.4 Initial staggering

**RESOLVED:** Initial appointments may use staggered terms of six (6), twelve (12), and eighteen (18) months solely to create rotation and avoid full simultaneous turnover.

## 8.5 Ordinary term length

**RESOLVED:** After the initial staggering cycle, each ordinary appointment to the Licensing Subcommittee shall be for a term of twelve (12) months.

## 8.6 Consecutive-term cap

**RESOLVED:** No person may serve more than two (2) consecutive ordinary terms on the Licensing Subcommittee unless later governance action expressly provides otherwise.

## 8.7 Cooling-off period

**RESOLVED:** A person who has completed two consecutive ordinary terms may not be reappointed until at least twelve (12) months have elapsed from the end of that second ordinary term, unless later governance action expressly provides otherwise.

## 8.8 Vacancies and replacement appointments

**RESOLVED:** A vacancy may be filled for the balance of the unexpired term through the applicable DAO process. Service for only the balance of an unexpired term does not count as a full ordinary term unless later governance action expressly provides otherwise.

## 8.9 Removal and resignation

**RESOLVED:** A Licensing Subcommittee member serves until resignation, removal through valid DAO process, expiry of term, or cessation of eligibility.

# 9. Procedure and internal decision rules

## 9.1 No single-person authority

**RESOLVED:** The Licensing Subcommittee shall not operate as a single-person authority.

## 9.2 Quorum

**RESOLVED:** Unless later governance action imposes a higher threshold, quorum is a majority of appointed members.

## 9.3 Voting

**RESOLVED:** Unless later governance action imposes a higher threshold, ordinary decisions of the Licensing Subcommittee require approval by a majority of those participating with quorum present.

## 9.4 No casting vote

**RESOLVED:** No chair or coordinator of the Licensing Subcommittee has a casting vote.

## 9.5 Conflicts and recusal

**RESOLVED:** Members of the Licensing Subcommittee must disclose material conflicts relating to Licensing Matters and recuse where appropriate. A conflicted member shall not be counted for the relevant vote to the extent required by later governance action or by the applicable conflict rule.

## 9.6 Individual capacity and judgment

**RESOLVED:** Each member of the Licensing Subcommittee serves and acts in that person's own separate capacity and on that person's own independent judgment as a DAO-side Subcommittee member under the Company Agreement and applicable DAO process. Service on the Licensing Subcommittee does not by itself make the member the agent, nominee, proxy, concealed representative, or transmission belt of any licensee, downstream opco, implementer, counterparty, or other person.

**RESOLVED:** Common status as Members of the Company, common service on the Licensing Subcommittee, discussion, persuasion, aligned views, meeting participation, draft circulation, historical alignment, social pressure, funding history, agenda-setting, or other course of dealing do not by themselves constitute, evidence, or create a voting agreement, pooling arrangement, coordinated decision-making arrangement, proxy path, nominee path, or other acting-in-concert arrangement.

**RESOLVED:** No member may treat a private instruction, undisclosed side arrangement, pre-committed external mandate, or practical instruction channel as a substitute for the Licensing Subcommittee's valid recorded process. The Licensing Subcommittee acts only through its valid collective process and documented approvals, and not through informal alignment, assumed bloc voting, or deemed consent among Members.

## 9.7 Written records

**RESOLVED:** The Licensing Subcommittee shall maintain written records sufficient to show appointments, terms, meeting or consent outcomes, recommendations, approvals, package identifiers, register updates, notices, certificates, recusals, and other material Company-side acts relating to Licensing Matters, subject to lawful confidentiality redactions where necessary.

# 10. Registers, ratification pathway, and implementation discipline

## 10.1 Required records

**RESOLVED:** Every Material Licensing Action approved or recommended under this memorandum shall be recorded with sufficient particularity to show, as applicable:

- the counterparty or licensee, whether named publicly or recorded through Confidential Particulars mechanics;
- the package identifier, path, or hash commitment;
- the relevant Protocol IP identifier or identifiers, subject label or labels, or register pointer or pointers where applicable;
- the category and scope of license;
- any material amendment, narrowing, revocation, reassignment, termination, or enforcement step;
- the date of approval and effective date;
- the authority basis; and
- any ministerial signatory used for execution.

## 10.2 Register and registry maintenance

**RESOLVED:** Licensing-side records shall be maintained in the applicable Company records, including as relevant:

- the Intellectual Property Registry where relevant to the licensed subject matter;
- the IP License & Assignment Register;
- the Counterparty Agreements Register; and
- the SOP Registry and governance log.

## 10.3 Ratification pathway

**RESOLVED:** To the extent required by the Company Agreement, any licensing arrangement or related recordkeeping update approved under delegated authority shall be submitted for ratification, confirmation, or reporting through the next appropriate Operational Pack or other governance record pathway.

## 10.4 No implied amendment of higher instruments

**RESOLVED:** No register entry, SOP entry, certificate, summary, side record, or package metadata update under this memorandum amends a Primary Instrument or expands the authority of any person beyond the scope granted by the Company Agreement and this memorandum.

# 11. Transitional rule

## 11.1 Framework before appointments

**RESOLVED:** This memorandum may be adopted before the appointment of specific Licensing Subcommittee members. Until appointments are made, this memorandum establishes the governance architecture only and does not by itself authorize any single person to exercise the Licensing Subcommittee's delegated approval function.

## 11.2 Future implementation items

**RESOLVED:** Later governance action may, without changing the core guardrails of this memorandum, address:

- appointment of specific natural persons to the Licensing Subcommittee;
- adoption or refinement of package categories, template forms, or schedule architectures;
- additional conflict rules, diligence procedures, or signatory mechanics;
- reporting templates and confidentiality procedures; and
- any ratification or operational pack protocol for licensing-side actions.

# 12. Guardrails and interpretation

## 12.1 Narrow construction

**RESOLVED:** This memorandum shall be construed narrowly to preserve the Protocol IP firewall, the licensing lane, the treasury lane, and the capacity, agency, and operational attribution limits reflected in the Company Agreement.

## 12.2 No waiver of existing limits

**RESOLVED:** Nothing in this memorandum waives, narrows, or overrides any existing limit in the Company Agreement or the IP License Framework concerning ownership of Protocol IP, agency, operational attribution, transitive rights, licensing authority, structural firewall protections, or automatic cross-lane effect.

## 12.3 No broader duty creation

**RESOLVED:** Nothing in this memorandum, including service on the Licensing Subcommittee, participation in review or package preparation, coordination with counsel or counterparties, issuance of certificates, or handling of Confidential Information, creates any fiduciary duty, trust obligation, partnership, joint venture, advisory obligation, supervisory obligation, or agency relationship beyond the Company Agreement, this memorandum, any valid written license package, and mandatory law.

**RESOLVED:** The conduct standard applicable under this memorandum remains good faith within scope, subject to the Company Agreement's existing allocation of duties and the contractual covenant of good faith and fair dealing as applicable.

## 12.4 No informal override

**RESOLVED:** No oral statement, informal understanding, course of dealing, silence, administrative practice, facilitative act, historical influence, or partial disclosure may amend, waive, narrow, expand, or reinterpret this memorandum or any limit stated in it.

## 12.5 No decontextualized or transitive interpretation

**RESOLVED:** No summary, certificate, register entry, package index, diligence note, hash anchor, posting, or other partial output relating to this memorandum may be treated as standalone authority or as creating any third-party, pass-through, holder-style, or reliance-based right unless a separate valid written instrument expressly so provides.

## 12.6 If inconsistency emerges

**RESOLVED:** If a provision of this memorandum is reasonably read in more than one way, the interpretation that better preserves the Protocol IP licensing lane, the treasury separation, the absence of operational attribution, the absence of downstream direction, and the no-single-person guardrail shall prevail to the maximum extent permitted by the Company Agreement and applicable law.

**Disclaimer (Governance Proposal; No Professional Advice).**

This document is a governance proposal and governance communication. If adopted by the DAO through its governance mechanisms, it may become binding on the DAO and persons exercising authority under the Company Agreement to the extent provided in the Company Agreement and applicable law. This document does not constitute legal, tax, financial, or other professional advice. The author(s) are not acting as legal counsel to the DAO or any member or user. No attorney-client relationship is created.

You must obtain your own independent advice for your circumstances.

# DP-00003 (MEM): Treasury Subcommittee ("The Illuminated") Ratification, Company Treasury Account Designation, and Initial Treasury Transfer

**Status:** Draft (intended for ratification via Governance System as part of The Gigabus Proposal)

**Version:** 1.0.12

**Owner:** SOLOMON DAO LLC (via Governance System)

**Applies to:** DAO governance participants; Treasury Subcommittee members; signers or operators of the Company Treasury Vault; persons handling Confidential Information under Undertakings; and any on-chain execution parties implementing the treasury portion of The Gigabus Proposal.

**Effective date:** Upon ratification by Governance System and successful on-chain execution of the treasury-related Execution Bundle steps, subject to the Formation Condition.

**Authority note:** This memorandum is the post-formation treasury activation step and the successor to the pre-formation readiness path adopted in DP-00001. It ratifies and confirms the Treasury Subcommittee as the operative Company Treasury Subcommittee for designated Company Treasury Account(s), to be read consistently with the Founding Charter provisions governing the Company Treasury Subcommittee and ordinary course treasury management. It activates delegated authority within strict limits, designates the Squads v4 Company Treasury Vault at `8GVq1srBAZBsCeYpwdKUwEXzDffwAE5xSLWB1ec2gerr` as a Company Treasury Account, and authorizes an initial treasury transfer. It does not authorize governance-threshold changes, buyback operations, legal-budget release steps, or any authority outside designated Company Treasury Account(s). It also does not create any decontextualized, by-conduct, third-party, pass-through, or status-based expansion of treasury authority beyond the Company Agreement hierarchy and the express text adopted here.

**Confidentiality classification:** Public (operational or security-sensitive details may be handled under Undertakings and kept confidential)

**Supersedes:** None

**Related:** the Operating Agreement of SOLOMON DAO LLC; the Founding Charter of SOLOMON DAO LLC, including the Company Treasury Subcommittee provisions; and the full DP-00003 memorandum.

---

## Intellectual Property Firewall

**"Protocol"** in this Resolution has the same meaning as **"Protocol IP"** as defined in the Company Agreement of SOLOMON DAO LLC (Operating Agreement §2.1(17)) — design, documentation, code, repositories, and other intellectual property. It does not mean an operating business, service, issuer, custodian, counterparty, or other person or entity.

Nothing in this Resolution authorizes the Company, the Head Steward, or any Subcommittee to direct, supervise, or control the operations of any Licensee, counterparty, service provider, or other person. Any external obligations arise only under the applicable License or other written agreement, and only to the extent expressly stated there.

# 1. Purpose

This memorandum is the post-formation treasury activation step. It:

1. follows and completes the pre-formation Treasury Subcommittee path already adopted in DP-00001;
2. confirms the designated Squads v4 Company Treasury Vault as an official **Company Treasury Account**;
3. ratifies and activates the Treasury Subcommittee's delegated authority over designated Company Treasury Account(s) only;
4. styles the Treasury Subcommittee as **"The Illuminated"** for chamber-identification purposes only;
5. transfers an initial **4,500,000 USDC** tranche from the main DAO treasury into the designated Company Treasury Vault at `8GVq1srBAZBsCeYpwdKUwEXzDffwAE5xSLWB1ec2gerr`; and
6. adopts the governance-side treasury policy framework, shared-cap rule, reporting expectation, and confidentiality posture under which the Treasury Subcommittee will operate.

## 2. Operative rule

This is normative text proposed for adoption by Governance System. If and only if it is adopted and the treasury-related Execution Bundle steps execute successfully, the operative clauses below are effective as stated, subject to the Formation Condition.

This memorandum forms part of the integrated Company governance record and must be read subject to the Company Agreement hierarchy. No deck, email, chat, issue list, facilitative note, excerpt, summary, metadata field, control record, registry entry, hash anchor, or machine-readable or transformed rendering may vary, reinterpret, expand, narrow, or override this memorandum or any higher-precedence instrument.

## 3. Definitions

1. **"Company"** means **SOLOMON DAO LLC**.
2. **"Company Treasury Account"** means a Solana account, smart contract, or address designated by Governance System as holding Company property for Company treasury operations and listed in the Smart Contract Registry, consistently with the Company Agreement.
3. **"Company Treasury Vault"** means the multisig or vault specified in §6.1.
4. **"Execution Bundle"** means the on-chain transactions that implement the on-chain portions of this memorandum.
5. **"Formation Condition"** means the Company's formation is legally effective on or before execution of the treasury-related Execution Bundle steps.
6. **"Governance System"** means the on-chain mechanism by which this proposal package is adopted and executed.
7. **"Treasury Subcommittee"** means the Company Treasury Subcommittee contemplated by the Company Agreement framework and confirmed for operative use under this memorandum.
8. **"The Illuminated"** means the Treasury Subcommittee when referred to by its chamber moniker under this memorandum.
9. **"Treasury Subcommittee Members"** means the members confirmed in §5.4 of this memorandum, unless later valid governance action removes, replaces, or adds members.
10. **"Treasury Operating Policy"** means the binding constraints in §7 and any policy annex, confidential parameter record, control record, or execution note maintained consistently with this memorandum, the Founding Charter, and any later valid Resolution.
11. **"Undertaking"** means any applicable Treasury Subcommittee confidentiality undertaking or equivalent controlled-information undertaking.

## 4. Formation condition and evidentiary hard gate

**RESOLVED:** No designation of a Company Treasury Account, no activation of delegated authority, and no initial treasury transfer under this memorandum is effective unless the Formation Condition is satisfied.

**RESOLVED:** Formation evidence must be published, linked, or hash-anchored as:

- certificate or registry evidence link, and or
- content hash or other record anchor of the formation evidence.

**Posting-time field:**

- formation evidence link and or hash: `[TO BE FILLED AT POSTING TIME]`

## 5. Treasury Subcommittee ratification and activation

### 5.1 Ratification and confirmation of role

**RESOLVED:** The DAO confirms and ratifies that the Treasury Subcommittee is the operative Company Treasury Subcommittee for management of designated Company Treasury Account(s) within the meaning of the Company Agreement and this memorandum, completing the intended transition from the pre-formation readiness stage adopted in DP-00001 to live post-formation authority within strict limits.

### 5.2 Chamber moniker

**RESOLVED:** For ceremonial and chamber-identification purposes only, the Treasury Subcommittee may be styled **"The Illuminated."** This moniker does not alter the legal identity, delegated scope, or limits of the Treasury Subcommittee.

### 5.3 Grant of delegated authority for Company accounts only

**RESOLVED:** Subject to the Formation Condition, the Treasury Subcommittee is granted delegated authority, within the ordinary course of treasury management contemplated by the Founding Charter, to manage **only** the Company Treasury Account(s) designated by Governance System, strictly within the Treasury Operating Policy constraints.

**RESOLVED:** The Treasury Subcommittee has **no authority** over any DAO treasury accounts that are not expressly designated as Company Treasury Accounts.

### 5.4 Membership and undertakings

**RESOLVED:** The Treasury Subcommittee Members confirmed under this memorandum are the persons previously appointed as Treasury Subcommittee Designates in DP-00001:

- Drew | Co-Founder @01Resolved : https://x.com/drew_12011
- Usman | Founder @Oro : https://x.com/theusmansal
- Kru | Founder @Umbra : https://x.com/kru_tweets
- Kollan | Co-Founder @MetaDAO: https://x.com/metanallok

**RESOLVED:** Each Treasury Subcommittee member must have an executed Undertaking as a condition precedent to receiving Confidential Information where such an undertaking is required by the applicable record or policy.

## 5.5 No individual treasury authority

**RESOLVED:** No single Treasury Subcommittee Member, signer, operator, or other person may by reason only of this memorandum unilaterally approve, originate, direct, represent, or carry into effect a Treasury Subcommittee decision, treasury movement, allowlist change, policy exception, role assignment, revocation waiver, or counterparty-facing treasury instruction, except to the extent a later valid Resolution or written delegation expressly authorizes a narrower ministerial act after valid approval.

## 5.6 Collective action default

**RESOLVED:** Unless later governance action expressly provides otherwise, the Treasury Subcommittee acts only through its valid collective process and documented approvals. No individual assent, informal chat approval, historical practice, signer access, operator access, or practical control point is sufficient by itself to constitute Treasury Subcommittee action.

**RESOLVED:** Any ambiguity is construed against unilateral authority.

## 5.7 Separate capacity and no deemed concert

**RESOLVED:** Each Treasury Subcommittee Member serves and acts in that person's own separate capacity and on that person's own independent judgment, subject only to the Company Agreement, this memorandum, any applicable Undertaking, valid Resolutions, any applicable written delegation, and mandatory law.

**RESOLVED:** Common status as Members of the Company, common service on the Treasury Subcommittee, discussion, persuasion, aligned views, meeting participation, draft circulation, historical alignment, social pressure, funding history, agenda-setting, or other course of dealing do not by themselves constitute, evidence, or create a voting agreement, pooling arrangement, coordinated decision-making arrangement, proxy path, nominee path, or other acting-in-concert arrangement.

**RESOLVED:** No Treasury Subcommittee Member may treat a private instruction, undisclosed side arrangement, practical instruction channel, or pre-committed external mandate as a substitute for the Treasury Subcommittee's valid recorded process.

## 5.8 No standing authority from role, influence, or facilitation

**RESOLVED:** The Head Steward, any coordinator, organizer, founder, adviser, service provider, or other person has no standing authority, solely by reason of that status, historical involvement, administrative role, practical influence, or document-routing role, to nominate, order, instruct, direct, manage, or otherwise determine the acts, votes, recusal decisions, recommendations, or outputs of the Treasury Subcommittee or any Treasury Subcommittee Member.

**RESOLVED:** No informal channel, side arrangement, practical choke point, agenda control, document-routing practice, calendar control, meeting facilitation, draft preparation, note circulation, or historical leadership position shall by itself create authority, veto power, or override power over the Treasury Subcommittee or any Treasury Subcommittee Member.

**RESOLVED:** The limited representative, statutory-compliance, documentary, and ministerial role of the Head Steward does not by itself create authority to direct, order, instruct, manage, or control the Treasury Subcommittee or any Treasury Subcommittee Member outside the scope expressly granted under the Company Agreement, a valid Resolution, or mandatory law.

## 5.9 Drafts and facilitative materials are non-operative unless adopted

**RESOLVED:** Any memorandum, proposal text, deck, note, checklist, draft policy, issue list, governance post, chat message, suggested agenda, summary, or other material prepared, circulated, or suggested by the Head Steward, any coordinator, organizer, founder, adviser, service provider, or other person is prepared only in a draft, facilitative, or informational capacity unless and until that material is separately adopted, approved, or incorporated through a valid Treasury Subcommittee or Company process.

**RESOLVED:** No such draft or facilitative material has direct operative effect within the Treasury Subcommittee merely by reason of circulation, authorship, presentation, historical reliance, or practical convenience. The Treasury Subcommittee remains responsible for reaching its own decisions through the process actually applicable to the matter.

**RESOLVED:** Neither the Head Steward nor any coordinator, organizer, founder, adviser, or service provider has any contractual obligation under this memorandum to prepare, circulate, maintain, or update any such material.

**RESOLVED:** The Treasury Subcommittee may, and where useful should, prepare its own internal notes, analyses, draft materials, and decision records, but absent a separate written obligation no Treasury Subcommittee Member is contractually required by this memorandum to prepare any particular work product.

## 5.10 Written records

**RESOLVED:** The Treasury Subcommittee shall maintain written records sufficient to show appointments, recusals, meeting or consent outcomes, approvals, applicable policy records, material treasury instructions, rationales, transaction references, and other material Company-side treasury acts, subject to lawful confidentiality redactions, delayed disclosure, or controlled handling where necessary.

## 5.11 Instrument hierarchy and controlling texts

**RESOLVED:** This memorandum must be read as part of the Company Agreement hierarchy and together with the Operating Agreement, the Founding Charter, the applicable registry structure, and any later valid Resolution. If any inconsistency appears, the higher-precedence instrument controls to the extent of the inconsistency.

**RESOLVED:** No deck, email, chat, issue list, facilitative note, excerpt, summary, metadata field, control record, registry entry, or machine-readable or transformed rendering may vary, reinterpret, expand, narrow, or override this memorandum or any higher-precedence instrument.

## 5.12 No informal amendment; no waiver by conduct

**RESOLVED:** No oral statement, informal understanding, silence, course of dealing, administrative accommodation, historical practice, or unilateral administrative act shall amend, supplement, waive, override, or disapply this memorandum or any limit stated in it.

**RESOLVED:** Any waiver or variation must be express, specific, in writing, and adopted by the person or body having authority under the Company Agreement to grant it.

**RESOLVED:** No person may rely on waiver, estoppel, acquiescence, apparent modification, quasi-estoppel, or similar doctrine merely by reason of conduct, custom, silence, facilitation, or administrative practice to widen Treasury Subcommittee authority, relax collective approval requirements, or change the distinction between Company Treasury Accounts and non-designated accounts, except to the extent mandatory law does not permit that exclusion.

## 5.13 No status-based or practical apparent authority

**RESOLVED:** No Treasury Subcommittee Member, signer, backup-only continuity signer, Head Steward, founder, organizer, adviser, service provider, or other person has apparent or implied authority in the treasury lane merely by reason of title, access, historical involvement, public association, document custody, wallet familiarity, communications access, or practical influence.

**RESOLVED:** Any person dealing with the treasury lane must look to the Company Agreement, this memorandum, valid collective approvals, and any authoritative control record, and not to informal indications, role descriptions, public assumptions, or prior practice alone.

## 5.14 No decontextualization; no transitive or holder-style rights

**RESOLVED:** This memorandum, any Treasury Operating Policy, and any controlled record, summary, excerpt, registry entry, or evidentiary anchor relating to it remain part of an integrated governance record and may not be presented or relied upon as a standalone source of broader authority divorced from the Company Agreement hierarchy.

**RESOLVED:** Except to the extent rights are separately created by a valid written agreement or by mandatory law, no operator, service provider, counterparty, payment recipient, holder, or other third party obtains any right, recourse, reliance basis, enforcement position, or pass-through benefit under this memorandum merely by reason of interacting with a Company Treasury Account, receiving a transfer, appearing in a control record, or seeing a public summary or posting.

## 5.15 No operating attribution from treasury constraints

**RESOLVED:** No treasury approval, allowlist, cap, reporting line, route permission, control note, review step, or other treasury-side constraint or record under this memorandum shall by itself make the Company the operator, controller, compliance principal, custodian, or service provider in respect of any third-party implementation, market-making activity, settlement rail, service stack, or counterparty-facing activity.

# 6. Company Treasury Account designation

## 6.1 Designation of Company Treasury Vault

**RESOLVED:** Subject to the Formation Condition, the following vault is designated as a **Company Treasury Account** and as the **Company Treasury Vault** for purposes of this memorandum:

- Company Treasury Vault name: `SOLOMON TREASURY SUBCOMMITTEE`
- Company Treasury Vault address (base58): `8GVq1srBAZBsCeYpwdKUwEXzDffwAE5xSLWB1ec2gerr`
- Network: `Solana mainnet-beta`

## 6.2 Signers, threshold, and continuity control

**RESOLVED:** The Company Treasury Vault shall operate as a **3 of 5** multisignature arrangement.

**RESOLVED:** Four of the five signers shall be the Treasury Subcommittee Members confirmed in §5.4.

The fifth signer may be maintained as a backup-only continuity signer solely to reduce operational bricking risk.

**RESOLVED:** Any backup-only continuity signer shall be subject to a minimum **2 day** timelock and shall not by reason only of that role acquire any independent policy-setting, approval, override, or unilateral treasury authority.

**RESOLVED:** The signer set, threshold, timelock, and any proposer-executor or analogous role separation for the Company Treasury Vault shall be maintained on the applicable authoritative control record, subject to the Treasury Operating Policy and any later valid Resolution.

**RESOLVED:** To the extent public disclosure of signer composition, identity of any backup-only continuity signer, role separation, rotation procedures, or related control mechanics would reasonably prejudice security, those details may be withheld from unrestricted public disclosure and maintained through controlled records, hash commitments, or other evidentiary pathways consistent with the Company Agreement.

## 6.3 Smart Contract Registry update and SOP Registry recording

**RESOLVED:** Subject to the Formation Condition and adoption of this memorandum, the Company shall update `DP-00000_REG-smart-contract-registry.md` to add the Company Treasury Vault designated in §6.1 as a new Part II **Company Treasury Accounts Register** entry.

**RESOLVED:** That registry update shall identify, at minimum, the next available Treasury ID or other sequential register identifier consistent with registry practice, the account purpose as the Treasury

Subcommittee or Company Treasury Vault, the address `8GVq1srBAZBsCeYpwdKUwEXzDffwAE5xSLWB1ec2gerr`, the network as `Solana mainnet-beta`, and the control note necessary to reflect that the address is a Company Treasury Account designated by this memorandum.

**RESOLVED:** The registry update shall be recorded through the **SOP Registry** pathway and maintained current in accordance with the Operating Agreement, the Founding Charter, and the registry's own maintenance rules. No such recording, indexing, or ministerial update step may rewrite the substance of the designation made here or expand authority beyond this memorandum and the Company Agreement.

# 7. Treasury Operating Policy

**RESOLVED:** Consistent with the Founding Charter provisions governing the Company Treasury Subcommittee and ordinary course treasury management, the Treasury Subcommittee's delegated authority is constrained by the following minimum controls:

1. **Account scope:** only designated Company Treasury Account(s).
2. **Shared per-period spending limit:** the existing applicable per-period treasury spend limit for the approved treasury lane remains a single aggregate cap. Use of the main DAO treasury and use of the Company Treasury Vault within that same approved treasury lane count toward the same cap and are not additive.
3. **No duplicate allowance:** designation or funding of the Company Treasury Vault does not create a second standalone monthly spending allowance, duplicate operational budget, or separate parallel cap for the same treasury lane.
4. **No implied control over non-designated accounts:** the shared-cap rule in this memorandum is a construction and accounting rule for the approved treasury lane only. It does not by itself designate the main DAO treasury as a Company Treasury Account and does not grant the Treasury Subcommittee authority over any non-designated DAO treasury account except to the extent expressly stated elsewhere in a valid instrument.
5. **Ordinary-course technical controls:** subject to valid collective process and the Company Agreement hierarchy, the Treasury Subcommittee may adopt, maintain, administer, rotate, narrow, or revoke revocable allowlists, route permissions, role assignments, transaction caps, operator appointments, and analogous technical controls for designated Company Treasury Account(s) where reasonably required for ordinary course treasury management.
6. **No authority expansion:** no Treasury Operating Policy, parameter record, allowlist, cap, operator appointment, or other treasury control adopted or administered under this memorandum may expand authority beyond the Company Agreement, the Founding Charter, this memorandum, or any later valid Resolution.
7. **Confidentiality and security posture:** the specific operational details of Treasury Operating Policy, including signer composition, threshold mechanics, route permissions, allowlists, technical caps, counterparty particulars, and security procedures, may be maintained as Confidential Information or Security-Sensitive Information where disclosure would reasonably prejudice security or Company interests.
8. **Revocation and governance override:** Governance System may revoke or modify permissions, rotate signers, and or freeze operations via subsequent proposal, emergency process, or lawful protective action to the extent permitted by the Company Agreement.
9. **No leverage:** no borrowing, margin, or leverage unless explicitly authorized by later governance action.

10. **Recordkeeping:** every outbound movement must have a recorded rationale and transaction reference, and any exception must be flagged on an internal record even if not publicly disclosed in full.

## 8. Initial treasury transfer into the Company Treasury Vault

**RESOLVED:** For clarity, the intended movement path under this memorandum is from the main DAO treasury into the Company Treasury Vault designated in §6.1, and not to any other account unless later governance action expressly provides otherwise.

**RESOLVED:** Subject to the Formation Condition, the Execution Bundle shall transfer **4,500,000 USDC** from the main DAO treasury into the Company Treasury Vault.

**RESOLVED:** The transfer of **4,500,000 USDC** into the Company Treasury Vault does not create a second or additive per-period treasury spending limit for the same approved treasury lane.

## 9. Reporting

**RESOLVED:** The Treasury Subcommittee shall make periodic reports in a manner and cadence consistent with the Company Agreement, the Founding Charter, this memorandum, and any later valid Resolution.

**RESOLVED:** Public treasury reporting may be summary-level, redacted, delayed, or otherwise structured so as not to disclose Confidential Information or Security-Sensitive Information where unrestricted disclosure would reasonably prejudice security or Company interests.

**RESOLVED:** Without requiring unrestricted public disclosure of operational particulars, treasury reports may include, as appropriate:

- opening and closing balances, or other balance summaries, for the reporting period;
- material inflows and outflows by asset or category;
- confirmations that treasury operations were conducted within applicable authority and policy;
- material incidents, exceptions, or remediation steps stated at a level that does not compromise security; and
- any further reporting required by a later valid Resolution.

## 10. Execution Bundle scope limitation

**RESOLVED:** The treasury-related Execution Bundle steps for this memorandum shall include only:

- designation or configuration references for the Company Treasury Vault, to the extent supported on-chain;
- any on-chain delegation or authority steps required, if applicable; and
- the initial treasury transfer or transfers in §8.

**RESOLVED:** The treasury-related Execution Bundle steps for this memorandum shall not include:

- governance threshold updates;
- buyback operations; or
- legal budget release steps not expressly stated here.

# 11. Guardrails and interpretation

## 11.1 Narrow construction

**RESOLVED:** This memorandum shall be construed narrowly to preserve the distinction between Company Treasury Accounts and non-Company treasury accounts, the distinction between treasury authority and all other governance lanes, and the limit that the Treasury Subcommittee acts only within adopted policies and limits.

## 11.2 No waiver of existing limits

**RESOLVED:** Nothing in this memorandum waives, narrows, or overrides any existing limit in the Company Agreement concerning the Head Steward's role, Subcommittee scope, no-agency principles, no-single-controller logic, security-sensitive information handling, the instrument hierarchy, or the rule that lower-order or facilitative materials do not override higher-order adopted texts.

## 11.3 No broader duty creation

**RESOLVED:** Nothing in this memorandum, including service as a Treasury Subcommittee Member, service as a signer or backup-only continuity signer, participation in reviews or reports, coordination with service providers or counterparties, or handling of Confidential Information, creates any fiduciary duty, trust obligation, partnership, joint venture, advisory obligation, custody obligation, or agency relationship beyond the Company Agreement, this memorandum, any valid Resolution, and mandatory law.

**RESOLVED:** The conduct standard applicable under this memorandum remains good faith within scope, subject to the Company Agreement's existing allocation of duties and the contractual covenant of good faith and fair dealing as applicable.

## 11.4 If inconsistency emerges

**RESOLVED:** If a provision of this memorandum is reasonably read in more than one way, the interpretation that better preserves multi-signature control, revocability, no unilateral control, and the distinction between Company and non-Company treasury accounts shall prevail.

## 11.5 No informal override

**RESOLVED:** No oral statement, informal understanding, course of dealing, silence, administrative practice, facilitative act, or historical usage may amend, waive, narrow, expand, or reinterpret this memorandum or any limit stated in it.

## 11.6 No decontextualized or transitive interpretation

**RESOLVED:** No excerpt, summary, registry entry, control note, hash anchor, posting, or other partial output relating to this memorandum may be treated as standalone authority or as creating any third-party, pass-through, or holder-style right unless a separate valid written instrument expressly so provides.

## 11.7 No operating attribution from treasury controls

**RESOLVED:** No treasury-side approval, allowlist, cap, route permission, review step, reporting line, or control record under this memorandum shall by itself make the Company or the Treasury Subcommittee the operator, controller, custodian, or compliance principal of any third-party implementation, service provider, counterparty arrangement, settlement rail, or market-facing activity.

**Disclaimer (Governance Proposal; No Professional Advice).**

This document is a governance proposal and governance communication. If adopted by the DAO through its governance mechanisms, it may become binding on the DAO and persons exercising authority under the Company Agreement to the extent provided in the Company Agreement and applicable law. This document does not constitute legal, tax, financial, or other professional advice. The author(s) are not acting as legal counsel to the DAO or any member or user. No attorney-client relationship is created.

You must obtain your own independent advice for your circumstances.

# DP-00003 (MEM): Legal Budget Clarification, Approved Use Expansion, and Spending Boundaries

**Status:** Draft (intended for ratification via Governance System as part of The Gigabus Proposal)

**Version:** 1.0.12

**Owner:** SOLOMON DAO LLC (via Governance System)

**Applies to:** DAO governance participants; any person with lawful instruction, signing, payment, reimbursement, bookkeeping, or recordkeeping responsibility in relation to the Legal Budget released in DP-00001; the Head Steward acting only within the limited ministerial, documentary, and recordkeeping capacities stated here; and any counsel, auditor, reviewer, service provider, or payee receiving funds from that budget for a Permitted Use.

**Effective date:** Upon ratification by Governance System.

**Authority note:** This memorandum supplements and clarifies the permitted uses of the capped legal/compliance budget previously released in DP-00001. It does not increase the amount of that budget, does not change the Legal Budget Wallet, does not create a new budget release, does not create any new signing or spending authority, and does not convert the Legal Budget into a general operating pool or unrestricted general discretionary fund.

**Confidentiality classification:** Public (invoice details, work product, privileged material, and sensitive implementation particulars may be handled under appropriate confidentiality controls)

**Supersedes:** None

**Related:** DP-00001; the full DP-00003 memorandum; the Operating Agreement of SOLOMON DAO LLC; the Founding Charter of SOLOMON DAO LLC; and any later Company-side books, records, invoices, reimbursement records, or payment approvals maintained consistently with this memorandum.

---

## Intellectual Property Firewall

**"Protocol"** in this Resolution has the same meaning as **"Protocol IP"** as defined in the Company Agreement of SOLOMON DAO LLC (Operating Agreement §2.1(17)) — design, documentation, code, repositories, and other intellectual property. It does not mean an operating business, service, issuer, custodian, counterparty, or other person or entity.

Nothing in this Resolution authorizes the Company, the Head Steward, or any Subcommittee to direct, supervise, or control the operations of any Licensee, counterparty, service provider, or other person. Any external obligations arise only under the applicable License or other written agreement, and only to the extent expressly stated there.

## 1. Purpose

This memorandum does five things.

1. confirms that the capped **Legal Budget** released in DP-00001 remains in place without increase and remains tied to the existing **Legal Budget Wallet**;
2. clarifies that the Legal Budget may be used not only for legal, regulatory, and related compliance work in the narrow original phrasing, but also for bounded audit, review, reimbursement, and analogous professional DAO-side work as stated here;
3. authorizes use of that budget for program, smart contract, protocol, treasury-control, security, legal, regulatory, and compliance audits or analogous review work connected to the Company, the DAO, or DAO- approved structures and programs;
4. authorizes payment or reimbursement of accrued, existing, or previously incurred legal and related professional expenses that are properly attributable to the Company or DAO and supported by reasonable records; and
5. states the exclusions and construction rules needed to ensure that the Legal Budget does not become an unrestricted general discretionary fund or open-ended operating budget.

## 2. Operative rule

This is normative text proposed for adoption by Governance System. If and only if it is adopted, the operative clauses below are effective according to their terms.

This memorandum supplements DP-00001 and should be read consistently with it. In the event of conflict, the more specific spending boundary, cap, and wallet restrictions stated in DP-00001 and this memorandum control over any looser characterization in a non-binding summary or informal communication.

This memorandum forms part of the integrated Company governance record and must be read subject to the Company Agreement hierarchy. No deck, email, chat, issue list, facilitative note, excerpt, summary, metadata field, payment note, reimbursement label, bookkeeping extract, or machine-readable or transformed rendering may vary, reinterpret, expand, narrow, or override this memorandum or any higher-precedence instrument.

## 3. Definitions

1. **"Company"** means **SOLOMON DAO LLC**.
2. **"DAO"** means the governance community acting through the Governance System and the Company Agreement framework.
3. **"Governance System"** means the on-chain mechanism by which this proposal package is adopted and executed.
4. **"Legal Budget"** means the capped legal/compliance budget approved and released in DP-00001 in the amount of **$150,000**.
5. **"Legal Budget Wallet"** means the destination wallet specified in DP-00001 for the Legal Budget.
6. **"Existing Legal Expense"** means an accrued, invoiced, advanced, reimbursable, or otherwise reasonably documented legal, regulatory, compliance, filing, structuring, drafting, governance, or related professional expense incurred for the Company or DAO before or after adoption of this memorandum.
7. **"Audit Work"** means program, smart contract, protocol, treasury-control, security, accounting-control, legal, regulatory, compliance, or analogous audit, assurance, attestation, or review work performed for the Company, the DAO, or a DAO-approved structure, package, program, or implementation path.
8. **"Permitted Use"** means a use of the Legal Budget falling within §4 or §5 and not excluded by §6.

# 4. Confirmation of cap, wallet, and non-expansion of amount

## 4.1 Existing cap remains fixed

**RESOLVED:** The Legal Budget remains capped at **$150,000** in the aggregate unless a later valid governance action expressly approves a different amount.

## 4.2 Existing wallet remains the same

**RESOLVED:** Nothing in this memorandum changes the **Legal Budget Wallet** designated in DP-00001 or requires a new on-chain release step, new wallet designation, or new treasury transfer.

## 4.3 No new spending authority

**RESOLVED:** Nothing in this memorandum creates any new signer, operator, reimbursement, payment-approval, custody, treasury, agency, or representation authority. It only clarifies and bounds the categories for which the already released Legal Budget may lawfully be used.

# 5. Permitted uses of the Legal Budget

## 5.1 Legal, regulatory, and related compliance work

**RESOLVED:** The Legal Budget may be used for legal, regulatory, compliance, filing, structuring, governance, drafting, transaction, recordkeeping, documentary, and analogous professional work undertaken for the Company or DAO.

## 5.2 Audit and review work

**RESOLVED:** The Legal Budget may be used for **Audit Work**, including without limitation program, smart contract, protocol, treasury-control, security, accounting-control, legal, regulatory, or compliance audits, reviews, attestations, or analogous independent assessment work related to the Company, the DAO, or DAO-approved structures, packages, programs, or implementations.

## 5.3 Payment, reimbursement, and settlement of accrued or existing expenses

**RESOLVED:** The Legal Budget may be used to pay, settle, reimburse, or otherwise satisfy **Existing Legal Expenses**, including accrued and unpaid amounts and amounts previously advanced by service providers, contributors, founders, members, or affiliated working parties, provided the expense was actually incurred for the Company or DAO and is supported by reasonable records, invoices, engagement materials, or other adequate documentary support.

## 5.4 Other bounded DAO-related professional and administrative expenses

**RESOLVED:** The Legal Budget may also be used for other **DAO-related** expenses of a similar professional or administrative character where such expenses are directly connected to one or more of the following:

- Company formation, maintenance, good standing, filings, or reporting;
- governance proposals, execution bundles, governance records, or registry maintenance;
- treasury architecture, treasury controls, multisig or vault setup, treasury policies, or treasury reporting;
- licensing architecture, transaction documentation, counterparty documentation, register maintenance, or compliance support;
- audit preparation, remediation support, evidence gathering, implementation-review support, or analogous review-readiness work;
- documentary, bookkeeping, accounting-support, administrative, or notarial work that is directly ancillary to the professional matters described in this memorandum.

## 5.5 Similar-character rule

**RESOLVED:** If a proposed use is not expressly listed but is of substantially similar character to the professional, documentary, filing, governance, audit, compliance, treasury-control, or recordkeeping matters listed in this memorandum, it may be treated as a Permitted Use only if it is directly attributable to the Company or DAO and is not excluded by §6.

## 6. Express exclusions and no unrestricted general discretionary fund rule

**RESOLVED:** The Legal Budget may **not** be used as an unrestricted general discretionary fund or open-ended operating pool.

**RESOLVED:** Without limitation, the Legal Budget may not be used for:

- general contributor payroll, salaries, bonuses, stipends, or routine operating compensation;
- general engineering or product-build costs, except for Audit Work or directly ancillary review-remediation support covered by §5;
- liquidity deployment, market making, trading, investment activity, treasury speculation, token purchases, or buybacks;
- grants, donations, sponsorships, entertainment, hospitality, conferences, or travel unrelated to a Permitted Use;
- unrelated marketing, growth, community campaigns, or business- development spend;
- personal expenses or reimbursements that are not actually attributable to the Company or DAO; or
- any use that would contradict the fixed cap, existing wallet, or no- new-authority rules stated in §4.

# 7. Recordkeeping and construction

## 7.1 Reasonable records required

**RESOLVED:** Payments, reimbursements, or settlements from the Legal Budget should be supported by invoices, engagement materials, reimbursement records, work descriptions, board or governance records, or other reasonable documentary support sufficient to show that the use falls within a Permitted Use.

## 7.2 Ambiguity construed narrowly

**RESOLVED:** Any ambiguity about whether a proposed use is within the scope of this memorandum shall be construed narrowly against broad operating discretion and against treatment of the Legal Budget as a general-purpose treasury pool.

## 7.3 No implied override of other instruments

**RESOLVED:** Nothing in this memorandum overrides the Company Agreement, creates new delegated authority, changes wallet control, alters privilege handling, or authorizes the Company or any Subcommittee to direct downstream operations.

## 7.4 No informal amendment; no waiver by conduct

**RESOLVED:** No oral statement, informal understanding, silence, course of dealing, administrative accommodation, historical practice, bookkeeping custom, or unilateral administrative act shall amend, supplement, waive, override, or disapply this memorandum or any limit stated in it.

**RESOLVED:** Any waiver or variation must be express, specific, in writing, and adopted by the person or body having authority under the Company Agreement to grant it.

**RESOLVED:** No person may rely on waiver, estoppel, acquiescence, apparent modification, quasi-estoppel, or similar doctrine merely by reason of conduct, custom, silence, facilitation, or administrative practice to widen Permitted Uses, bypass the fixed cap or existing wallet restrictions, or convert this memorandum into an open-ended operating budget, except to the extent mandatory law does not permit that exclusion.

## 7.5 No status-based or practical apparent authority

**RESOLVED:** No Head Steward, founder, organizer, contributor, reimbursement claimant, service provider, bookkeeper, payment coordinator, or other person has apparent or implied authority in relation to the Legal Budget merely by reason of title, prior involvement, invoice handling, public association, bookkeeping access, communications access, or practical influence.

**RESOLVED:** Any person dealing with the Legal Budget must look to DP-00001, this memorandum, the actual wallet and signer arrangement, and valid approvals and supporting records, and not to informal indications, role descriptions, public assumptions, or prior practice alone.

## 7.6 No decontextualization; no transitive or holder-style rights

**RESOLVED:** This memorandum and any invoice, reimbursement record, payment note, bookkeeping extract, summary, or evidentiary anchor relating to it remain part of an integrated governance and recordkeeping framework and may not be presented or relied upon as a standalone source of broader spending authority divorced from DP-00001, the Company Agreement hierarchy, and the underlying supporting records.

**RESOLVED:** Except to the extent rights are separately created by a valid written agreement or by mandatory law, no payee, claimant, service provider, reimbursement recipient, holder, or other third party obtains any right, recourse, reliance basis, enforcement position, or pass-through benefit under this memorandum merely by reason of receiving a payment, submitting an invoice, appearing in a budget record, or seeing a public summary or posting.

## 7.7 No operating attribution from budget-side controls

**RESOLVED:** No budget-side approval, review, invoice check, reimbursement requirement, record, payment routing step, or bookkeeping control under this memorandum shall by itself make the Company or any person acting within this memorandum the operator, controller, compliance principal, custodian, or service provider in respect of any downstream implementation, counterparty arrangement, service stack, or operating activity to which the underlying work may relate.

## 7.8 No broader duty creation

**RESOLVED:** Nothing in this memorandum, including invoice review, reimbursement processing, payment coordination, bookkeeping support, or recordkeeping, creates any fiduciary duty, trust obligation, partnership, joint venture, advisory obligation, or agency relationship beyond the Company Agreement, this memorandum, any valid written engagement, and mandatory law.

**Disclaimer (Governance Proposal; No Professional Advice).**

This document is a governance proposal and governance communication. If adopted by the DAO through its governance mechanisms, it may become binding on the DAO and persons exercising authority under the Company Agreement to the extent provided in the Company Agreement and applicable law. This document does not constitute legal, tax, financial, or other professional advice. The author(s) are not acting as legal counsel to the DAO or any member or user. No attorney-client relationship is created.

You must obtain your own independent advice for your circumstances.

# DP-00003 (OP-00001): Operational Pack No. 00001 - Initial Tertiary Instrument Ratification

**Status:** Draft (intended for ratification via Governance System as part of the Gigabus Proposal)

**Version:** 1.0.12

**Document class:** OP

**Operational Pack Identifier:** OP-00001

**Owner:** SOLOMON DAO LLC (via Governance System)

**Applies to:** DAO governance participants; the Head Steward acting only within the limited ministerial, documentary, and recordkeeping role stated here; any Subcommittee or person exercising authority under the Company Agreement who relies on ratified Tertiary Instruments; and any person reviewing the governance record for evidence of SOP ratification and SOP Registry anchoring.

**Effective date:** Upon ratification by Governance System, with registry publication, recordation, or hash anchoring to follow on a ministerial basis in accordance with this memorandum and the Company Agreement.

**Authority note:** This memorandum is the Operational Pack contemplated by Founding Charter Article VIII, Operating Agreement §2.1(24), and SOP-00000. It ratifies **SOP-00001** and **SOP-00002** as adopted Tertiary Instruments by reference to their identifiers, versions, registry paths, and content identifiers rather than by reproducing their full text in this proposal packet.

It states the scope statement, change log, adoption targets, and effective-date rule, and provides the ministerial pathway for recording those adopted instruments in the SOP Registry. It does not amend any Primary Instrument or Secondary Instrument, does not expand authority, and does not authorize any person to rewrite the adopted text during recordation.

**Confidentiality classification:** Public

**Supersedes:** None

**Related:** the Operating Agreement of SOLOMON DAO LLC; the Founding Charter of SOLOMON DAO LLC; SOP-00000; SOP-00001; SOP-00002; the SOP Registry; and the full DP-00003 memorandum.

---

## Intellectual Property Firewall

**"Protocol"** in this Resolution has the same meaning as **"Protocol IP"** as defined in the Company Agreement of SOLOMON DAO LLC (Operating Agreement §2.1(17)) — design, documentation, code, repositories, and other intellectual property. It does not mean an operating business, service, issuer, custodian, counterparty, or other person or entity.

Nothing in this Resolution authorizes the Company, the Head Steward, or any Subcommittee to direct, supervise, or control the operations of any Licensee, counterparty, service provider, or other person. Any external obligations arise only under the applicable License or other written agreement, and only to the extent expressly stated there.

## 1. Purpose

This memorandum does five things.

1. states the scope statement for this Operational Pack;
2. states the change log for the pack;
3. ratifies **SOP-00001** and **SOP-00002** as adopted Tertiary Instruments of the Company Agreement;
4. states the registry-reference, content-identifier, and effective-date fields required for this Operational Pack; and
5. authorizes only the ministerial recordation steps needed to anchor the adopted instruments into the **SOP Registry** as the current ratified copies, without discretion to alter their substance.

## 2. Operative rule

This is normative text proposed for adoption by Governance System. If and only if it is adopted, the SOP targets identified in §6 are ratified as Tertiary Instruments according to their own terms and the Company Agreement hierarchy.

For avoidance of doubt:

1. the adoption targets are the identified SOP instruments as specified in §6, not silently altered later copies;
2. the public **SOP Registry** may publish or update the current ratified copy after proposal adoption, but the adopted governance record controls if a later registry copy is inconsistent with the ratified identifier, version, or content identifier; and
3. if immediate public registry publication is not technically available at the exact moment of proposal adoption, the Head Steward may perform the ministerial recordation, anchoring, or publication step afterwards, without discretion to change substance, and the adopted proposal record controls until that step is completed.

This memorandum forms part of the integrated Company governance record and must be read subject to the Company Agreement hierarchy. No deck, email, chat, issue list, facilitative note, excerpt, summary, metadata field, registry note, commit message, hash anchor, or machine-readable or transformed rendering may vary, reinterpret, expand, narrow, or override this memorandum, the identified Adoption Targets, or any higher-precedence instrument.

## 3. Definitions

1. **"Adoption Target"** means a SOP instrument identified in §6 for ratification through this Operational Pack.
2. **"Content Identifier"** means a SHA-256 hash, CID, Git commit reference, or similar identifier sufficient to anchor a specific text in the governance record or SOP Registry.
3. **"Operational Pack"** means this memorandum and the resulting governance record package by which the Adoption Targets are ratified.
4. **"SOP Registry"** means the Company's canonical record repository designated under the Company Agreement for maintaining adopted instruments, registries, registers, and SOP artefacts.
5. **"Tertiary Instrument"** has the meaning given in the Company Agreement and includes SOPs and related operational artefacts maintained in the SOP Registry.
6. **"Ministerial Recordation Step"** means publication, register entry, hash anchoring, commit, content-address publication, metadata entry, or similar documentary step that records in the SOP Registry a SOP already ratified under this memorandum, without discretion to alter the ratified substance.

# 4. Scope statement and change log

## 4.1 Scope statement

**RESOLVED:** Operational Pack No. 00001 covers the initial public ratification of the following Tertiary Instruments:

1. **SOP-00001: SOP Registry and Corporate Equivalency** 2. **SOP-00002: Futurnetic Principles**

## 4.2 Change log

**RESOLVED:** For this initial Operational Pack, the change log is:

1. ratifies **SOP-00001** as the Company's initial public SOP governing the SOP Registry and corporate-equivalency framework; and 2. ratifies **SOP-00002** as the Company's initial public SOP stating the Futurnetic governance and operational principles framework.

## 5. Effective date

**RESOLVED:** Each Adoption Target identified in §6 becomes effective upon ratification of this Operational Pack by Governance System, subject to its own stated terms and the Company Agreement hierarchy.

## 6. Adoption targets and registry anchors

**RESOLVED:** The following Adoption Targets are ratified through this Operational Pack:

| Identifier | Title | Version | Confidentiality | SOP Registry path / URL | Content identifier (hash / CID / commit) |
|---|---|---|---|---|---|
| SOP-00001 | SOP Registry and Corporate Equivalency | 1.0.0 | Public | https://github.com/SolomonDAOrg/sop-registry/blob/main/living/SOP-00001_SOP-Registry-and-Corporate-Equivalency.md | commit:2670db073a89d9e4fcaa040bdb25997fbf211346 |
| SOP-00002 | Futurnetic Principles | 1.0.0 | Public | https://github.com/SolomonDAOrg/sop-registry/blob/main/living/SOP-00002_SOP-Futurnetic-Principles.md | commit:ecc262aa20476c496bd6d75860423bfab76ac868 |

record-evidence fields only. Filling them at posting time does not grant authority to revise the ratified text, identifier, or version.

**RESOLVED:** A registry copy later published under the recorded path / URL should match the ratified instrument identified in the table above. If there is a mismatch, the ratified governance record controls until the registry entry is corrected.

## 7. Ministerial recordation path

**RESOLVED:** After ratification, the Head Steward may perform the following Ministerial Recordation Steps, without discretion to alter substance:

1. publish or update the current ratified copy in the **SOP Registry**;
2. publish or update the metadata entry for each Adoption Target, including identifier, title, version, confidentiality classification, effective date, registry path, and content identifier;
3. publish or update a change-log or Operational Pack entry in the **SOP Registry**; and
4. publish a public hash, CID, commit reference, or equivalent anchor if a direct full-text publication step is delayed or handled separately.

**RESOLVED:** These Ministerial Recordation Steps are evidentiary, documentary, and publication steps only. They do not confer authority to edit or restate the ratified SOP substance.

## 8. Hierarchy and limits

**RESOLVED:** This memorandum and the Adoption Targets ratified through it are **Tertiary Instruments** only.

**RESOLVED:** No Adoption Target, registry entry, Operational Pack record, or later SOP Registry publication may:

1. amend a **Primary Instrument** or **Secondary Instrument**;
2. expand authority beyond what the Company Agreement, applicable law, and any relevant on-chain constraints already permit;
3. grant new rights to access or move Company Treasury Accounts;
4. create obligations for Members beyond existing obligations; or
5. recharacterize the Company, the Head Steward, or any Subcommittee as the operator or controller of any Licensee, counterparty, service provider, or Implementation.

**RESOLVED:** No oral statement, informal understanding, silence, course of dealing, administrative practice, publication lag, repository custom, or unilateral recordation step may amend, waive, override, restate, or disapply this memorandum or the ratified identity and content of any Adoption Target.

**RESOLVED:** Any ministerial publication, commit, metadata update, hash anchor, or other recordation step under this memorandum is evidentiary only and does not create any apparent or implied authority to edit, modernize, restyle, or reinterpret the ratified instrument text.

**RESOLVED:** No registry copy, extract, metadata view, commit reference, hash, CID, summary, posting, or other partial output relating to this Operational Pack may be treated as a standalone source of broader authority or as creating any third-party, pass-through, holder-style, or reliance-based right unless a separate valid written instrument expressly so provides.

## 9. Posting-time fields

The following fields are intended to be completed at posting time or in the immediately associated registry record:

- SOP Registry path / URL for **SOP-00001**: `https://github.com/SolomonDAOrg/sop-registry/blob/main/living/SOP-00001_SOP-Registry-and-Corporate-Equivalency.md`
- SOP Registry path / URL for **SOP-00002**: `https://github.com/SolomonDAOrg/sop-registry/blob/main/living/SOP-00002_SOP-Futurnetic-Principles.md`
- content identifier for **SOP-00001**: `commit:2670db073a89d9e4fcaa040bdb25997fbf211346`
- content identifier for **SOP-00002**: `commit:ecc262aa20476c496bd6d75860423bfab76ac868`

## 10. No implied broader effect

Ratification of the Adoption Targets through this Operational Pack:

1. does not make the Company, the Head Steward, or any Subcommittee the operator of any Implementation;
2. does not create any unstated fiduciary, agency, partnership, or acting-in-concert relationship;
3. does not convert repository publication into legal advice, certification, or third-party reliance material;
4. does not create any transitive, pass-through, third-party-beneficiary, holder-style, or recourse right merely because a person reads, relies on, or distributes a registry copy or summary; and
5. does not displace the Company Agreement hierarchy or any applicable confidentiality limits.

**Disclaimer (Governance Proposal; No Professional Advice).**

This document is a governance proposal and governance communication. If adopted by the DAO through its governance mechanisms, it may become binding on the DAO and persons exercising authority under the Company Agreement to the extent provided in the Company Agreement and applicable law.
